

**NOTICE OF FINAL DECISION
FOR THE ISSUANCE OF AUTHORITY TO CONSTRUCT AND
SIGNIFICANT MODIFICATION OF FEDERALLY
MANDATED OPERATING PERMIT**

NOTICE IS HEREBY GIVEN that the Air Pollution Control Officer has issued the Authority to Construct permits to E & J Gallo Winery for the modification of an existing digester served by a flare to allow the digester gas generated to be sent to an equipment at the facility that is authorized to utilize digester gas, and for the installation of a new 1,966 bhp IC engine that will power an electrical generator and will be fueled with natural gas and digester gas from the existing anaerobic reactor, at 18000 W River Rd, Livingston.

All comments received following the District's preliminary decision on this project were considered.

Comments received by the District during the public notice period resulted in clarifications being made in the process description in the application review and a revised equipment description for the digester gas operation listed under permit N-1237-661-5. These changes were minor and did not trigger additional public notification requirements, nor did they have any impact upon the Best Available Control Technology determination or on the amount of offsets required for project approval.

The application review, project # N-1211986, is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm, the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, 1990 EAST GETTYSBURG AVENUE, FRESNO, CA 93726, and at any other District office. For additional information, please contact the District at (559) 230-6000.
