

**NOTICE OF PRELIMINARY DECISION  
FOR THE ISSUANCE OF AUTHORITY TO CONSTRUCT AND  
THE PROPOSED SIGNIFICANT MODIFICATION OF FEDERALLY  
MANDATED OPERATING PERMIT**

NOTICE IS HEREBY GIVEN that the San Joaquin Valley Air Pollution Control District solicits public comment on the proposed significant modification of Fresno/Clovis Regional WWTP at 5607 W Jensen Ave, Fresno, California. Fresno/Clovis Regional Wastewater Reclamation Facility has requested to install two 75.1 MMBtu/hr ultra-low emission flares that will become the primary means to dispose of the digester gas, to designate an existing 36.3 MMBtu/hr flare as an emergency flare, and to remove the conditions limiting total NOx emissions from the existing 36.3 MMBtu/hr flare and two transportable diesel-fueled IC engines.

The District's analysis of the legal and factual basis for this proposed action, project # C-1193676, is available for public inspection at [http://www.valleyair.org/notices/public\\_notices\\_idx.htm](http://www.valleyair.org/notices/public_notices_idx.htm) and at any District office. The emission increases associated with this project are: 10,666 lb-NOx/year (calculated Federal increase), 30,960 lb-SOx/year, 6,604 lb-PM10/year, 6,604 lb-PM2.5/year, and 509 lb-VOC/year. This will be the public's only opportunity to comment on the specific conditions of the modification. If requested, the District will hold a public hearing regarding issuance of this modification. For additional information, please contact the District at (209) 557-6400. Written comments on this project must be sent or postmarked by August 22, 2023 to [publicnotices@valleyair.org](mailto:publicnotices@valleyair.org) or **BRIAN CLEMENTS, DIRECTOR OF PERMIT SERVICES, SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, 4800 ENTERPRISE WAY, MODESTO, CA 95356.**
