

RULE 6120 EPISODE TERMINATION (Adopted May 21, 1992, Amended December 17, 1992)

1.0 Requirements

The APCO shall declare the termination of the appropriate episode whenever the concentration of an air contaminant which caused the declaration of such episode has been verified to be below the levels set forth in Rule 6030 (Episode Criteria Levels) for the calling of such episode and the available scientific and meteorological data indicate that the concentration of such air contaminant will not immediately increase again so as to reach the levels set forth for such episode in Rule 6030 (Episode Criteria Levels). The APCO shall immediately notify those required by Rule 6060 (Administration of Emergency Program) of the declaration of the termination of the episode. The San Joaquin Valley Communications shall be requested to broadcast the termination over the School Alert System, Sigalert System and the Law Enforcement Communication System.
