BEFORE THE GOVERNING BOARD OF THE
SAN JOAQUIN VALLEY UNIFIED
AIR POLLUTION CONTROL DISTRICT

IN THE MATTER OF: RESOLUTION NO. 04-10-07
ADOPTING THE SAN JOAQUIN VALLEY
UNIFIED AIR POLLUTION CONTROL
DISTRICT EXTREME OZONE
ATTAINMENT DEMONSTRATION PLAN

WHEREAS, the San Joaquin Valley Unified Air Pollution Control District
("District") is a duly constituted unified district, as provided in California Health and
Safety Code sections 40150 to 40161; and

WHEREAS, the United States Environmental Protection Agency (EPA)
has classified the San Joaquin Valley Air Basin (SJVAB) as an extreme
nonattainment area for the federal 1-hour ozone ambient air quality standards; and

WHEREAS, such classification as extreme nonattainment requires
attainment of the federal 1-hour ozone standards in the SJVAB as expeditiously as
practicable but not later than November 15, 2010; and

WHEREAS, as given in Volume 69, Number 74 of the Federal Register
(April 16, 2004, page 20552), EPA requires the State of California to submit a plan by
November 15, 2004 that demonstrates attainment of the federal 1-hour ozone
standards in the SJVAB by the date given above; and

WHEREAS, the District, the California Air Resources Board (ARB), and
the eight Transportation Planning Agencies (TPAs) in the SJVAB prepared the
Extreme Ozone Attainment Demonstration Plan (OADP), which contains all required
elements and demonstrates attainment of the federal 1-hour ozone ambient air quality
standards by November 15, 2010; and

-1-

Resolution for Extreme Ozone Attainment Demonstration Plan
WHEREAS, emission control measures to be implemented by the ARB and EPA in the post-2005 time frame on sources largely outside the District's authority to control are essential to demonstrating November 15, 2010 attainment of the federal 1-hour ozone standards in the SJVAB; and

WHEREAS, the Extreme OADP meets federal Clean Air Act requirements for demonstrating rate of progress in reducing emissions of ozone precursors for extreme areas for the years 2008 and 2010; and

WHEREAS, the Extreme OADP also meets California Clean Air Act requirements for preparing and submitting Triennial Progress Reports and Triennial Revisions to the 1991 Air Quality Attainment Plan directed at attainment of the California 1-hour ambient air quality standard for ozone, including the reporting of trends in required air quality indicators and evaluation of District ozone precursor emission control measures and comparison with said measures implemented in adjacent downwind districts; and

WHEREAS, the District issued a Draft Status Report on the Extreme OADP in December 2003 that listed District and ARB control measures to be included in the OADP, and described preliminary photochemical modeling results; and

WHEREAS, the District held workshops for the Draft Extreme OADP on July 23, 2003; January 6-7, 2004; and August 12-13, 2004; and the District responded to written and oral comments that were received during comment periods for all three sets of workshops (and posted said comments and responses on the ozone plan website), including the Draft Plan comment period of July 30—August 27, 2004; and

WHEREAS, after close of the comment period on the Draft Plan, the District made changes in the Draft Plan text and prepared a list of changes made to the Draft Plan that are reflected in the Proposed Extreme OADP; and

WHEREAS, after posting the proposed Extreme OADP 30 days in advance of the hearing date, the District and ARB identified additional minor technical
revisions to the Extreme OADP and described those to the District Governing Board
at the September 16, 2004 District Governing Board public meeting and included
them in an "Errata" page that was distributed at said meeting; and

WHEREAS, the District Governing Board directed staff, at the
September 16, 2004 public meeting, to incorporate the "Errata" page changes into the
Proposed Extreme OADP, and to make any other changes to the Proposed Extreme
OADP as needed to ensure consistency, and to make the revised plan available in
advance of the October 8, 2004 Governing Board hearing; and

WHEREAS, the Plan includes sub-area emissions budgets for 2008 and
2010 that must be met by each of the eight counties, respectively, in the San Joaquin
Valley Air Basin for transportation conformity; and

WHEREAS, specific language will be developed during the rule
development process that addresses emission control measure feasibility issues at a
much greater level of detail than was possible during plan development; and

WHEREAS, individual control measures may be revised from what is
proposed in the Plan, and the District is committed to achieving equivalent emission
reductions from the overall control strategy in the same time frames as proposed in
the Plan; and

WHEREAS, the technical ozone modeling work supporting the Extreme
OADP could not have been accomplished without the leadership, funding, and work
products provided through the Study Agency; and

WHEREAS, the ongoing Central California Ozone Study (CCOS) will
continue to produce results that help provide an improved understanding of ozone
formation in the SJVAB, including relationships among meteorology, atmospheric
chemistry, and ozone precursor emissions; and

WHEREAS, the District and the ARB developed the Extreme OADP with
the best CCOS information available through March of 2004; and

Resolution for Extreme Ozone Attainment Demonstration Plan
WHEREAS, the demonstration of attainment of the federal 1-hour ozone standard in this Extreme OADP depends upon a small quantity of emissions reductions for which control measures have not yet been specified and which therefore have been assigned to the category of "Long-Term Measures"; and

WHEREAS, a public hearing for the adoption of the Plan was duly noticed and held on October 8, 2004, in accordance with law; and

WHEREAS, EPA's Final Rule approving the reclassification of the SJVAB to extreme nonattainment for the federal 1-hour ozone standards requires the District to submit revised Title V and New Source Review (NSR) rules to EPA by May 16, 2005; and

WHEREAS, this Board concurs with the recommendations of its staff;

NOW, THEREFORE, be it resolved as follows:

1. The District Governing Board adopts the Extreme OADP, thereby fulfilling separate federal and state air quality planning requirements. Said Plan and its circulated Appendices are attached hereto and are incorporated herein as Exhibit "A."

2. The Extreme OADP has been prepared consistent with the requirements of the Federal Clean Air Act and corresponding guidance of the U.S. Environmental Protection Agency (EPA).

3. The California Clean Air Act components of the Plan have been prepared consistent with the requirements of the California Health and Safety Code and corresponding guidance of the ARB.

4. The District has completed a Final Environmental Impact Report (FEIR) for said Extreme OADP that has been prepared and properly noticed pursuant to the California Environmental Quality Act (CEQA) and the CEQA Guidelines. This FEIR represents CEQA compliance for the Extreme OADP, including the 2008 and 2010 Rate of Progress demonstrations, and the California Clean Air Act Triennial...
Progress Report and Plan Revision. The District Governing Board has reviewed and considered information in the FEIR. The District Governing Board certifies that the FEIR reflects the independent judgment and analysis of the District. In accordance with the provisions of Section 15094 of the CEQA Guidelines, the Executive Director/Air Pollution Control Officer is hereby directed to cause to be filed a Notice of Determination with the County Clerks of each of the counties in the District.

5. The District Governing Board hereby finds, based on the evidence and information presented at the hearing upon which its decision is based, that all notices required to be given by law have been duly given, and that the District Governing Board has allowed public testimony in accordance with law.

6. Adoption of said Plan is necessary to comply with the Federal Clean Air Act and the California Clean Air Act and will promote the health and welfare of the residents of the San Joaquin Valley Air Basin. Rule development under the plan will be in accordance with the District's rule development procedure with due consideration of technological feasibility, cost-effectiveness, socio-economic impact, and environmental impact.

7. The Executive Director/Air Pollution Control Officer is hereby directed to forward a copy of this Resolution, the Extreme OADP, and Appendices to the ARB.

8. District staff is directed to work with stakeholders and EPA to ensure that rules developed as a result of adoption of the Extreme OADP address technical and economic feasibility issues identified during plan development along with those that arise during the rule development process so that the rules are both fair and approvable by EPA.

9. The District Governing Board commits to adopt and implement the rules and measures in the Extreme OADP by the dates specified in Chapter 4 to achieve the emissions reductions shown in Chapter 4, and to submit these rules and
measures to the ARB within one month of adoption for transmittal to EPA as a revision to the State Implementation Plan. If the total emission reductions from the adopted rules are less than those committed to in the Plan, the District Governing Board commits to adopt, submit, and implement substitute rules and measures that will achieve equivalent reductions in emissions of ozone precursors in the same adoption and implementation timeframes.

10. District staff is directed to identify by spring 2007 specific control measures to achieve the total quantity of emissions reductions placed in the category of “Long-Term Measures”, and to make any other necessary revisions to the Extreme OADP at the same time.

11. The District Governing Board requests that ARB authorize its Executive Officer to include the District’s Extreme OADP, as adopted by the District’s Governing Board, in the California State Implementation Plan for submittal to the EPA.

12. District staff is hereby authorized to make any minor typographical and technical changes in the Plan and Appendices that are necessary to correct minor errors, clarify wording, or to satisfy ARB and EPA technical requirements, provided that the Plan’s conclusions or control requirements do not change.

13. The District commits to submitting revised Title V and NSR rules to EPA by May 16, 2005. The requirements of these rules could be revisited again upon revocation of the federal 1-hour ozone standards.
14. THE FOREGOING was passed and adopted by the following vote of the Governing Board of the San Joaquin Valley Unified Air Pollution Control District this 8th day of October 2004, to wit:

NOES: No.

ABSENT: Sieglock and Mayfield.

SAN JOAQUIN VALLEY UNIFIED
AIR POLLUTION CONTROL DISTRICT
