CHEVRON has requested a short variance from the applicable requirements of District Rules 2010, 2070, 2201, 2520, 4401, and 4623, in addition to applicable conditions of the subject permits. The requested variance period would be for a non-consecutive 24 hour period to occur sometime between June 15, 2023, and August 15, 2023, inclusive. If granted, the variance would allow CHEVRON to continue to store VOC containing liquids in the subject tanks without an operating or functional VRS while CHEVRON conducts the proposed work. In addition, it will allow wells with closed casing gas vents to produce into tanks that do not have a functional or operating VRS.
