YOUR TIP OF THE MONTH!

The amount of energy required to deliver water to your home is significant. According to the EPA, outdoor residential water use can exceed the amount used for all other household purposes, especially in hot, dry climates. Over-watering your lawn increases energy demands and, subsequently, air pollution emissions from power plants.

Ref: http://www.epa.gov/greenhomes/ConserveWater.htm#landscaping

Tip: Minimize the amount of water used in landscaping by:

- Installing drought-tolerant landscaping,
- Installing a drip system to further increase your water efficiency,
- Watering your lawn late at night or early in the morning to reduce the amount of water lost to evaporation.
