

San Joaquin Valley

AIR POLLUTION CONTROL DISTRICT

Memorandum

Date: June 13, 2007
To: Heavy-Duty Engine Program Applicant
From: Emission Reduction Incentive Program
Subject: Short-Term Incentive Fund Availability

Thank you for your interest in the San Joaquin Valley Air Pollution Control District (District) Emission Reduction Incentive Program (ERIP). Due to the increased interest in the District's incentive programs, the number of applications the District has received for emission reduction projects exceeds currently available funds. As a result, money for your project may not be immediately available.

However, your application has **NOT** been cancelled and will remain active. ERIP staff will continue to expedite the processing of all applications in anticipation of future funding availability.

ERIP staff will contact you as money for your project becomes available. We apologize for any inconvenience this delay might cause.

Thank you again for your interest in the Heavy-Duty Engine Incentive Program and your commitment to cleaner air in the San Joaquin Valley. If you have any questions, please call (559) 230-5800 or email weberip@valleyair.org and ERIP staff will be happy to assist you. Please be sure to reference your Project Number.
