

JAMES W. SWEET

Senior Air Quality Specialist/Atmospheric Scientist - San Joaquin Valley Air Pollution Control District

Mr. Sweet has spent 21 years in atmospheric science and modeling with the Air District and its predecessor. He is involved in District and Study Agency Research projects including cotton gin particulate studies, agricultural emissions studies, and green waste emissions studies.

He has also participated in Policy Committee and Technical Committee research design and development, and coordinated Policy Subcommittee development of long-term agricultural air quality research plans. His current responsibilities in the Plan Development section include State Implementation Plans (SIPs).

Previously, Mr. Sweet was a risks and hazardous operations consultant, and was an officer in the U.S. Army with classified status.

He earned his B.S. in Applied Mathematics at Florida Tech University and spent three years as a research assistant with Western Research Company.
