

The District will now accept breakdown notifications via e-mail.

As of January 31, 2007 e-mail boxes are available so that sources may notify the District of breakdown occurrences. This optional method will provide more reliable verification of submission times.

Each Region has its own mailbox and sources should notify the region in which the affected permit is located. The case-sensitive addresses are:

North.Breakdown@valleyair.org

Central.Breakdown@valleyair.org

South.Breakdown@valleyair.org

The same format as used in facsimile notifications is acceptable. Sources should contact their inspector or their local District Office if they have questions.

It should be noted that the addition of the e-mail reporting does not alter the required reporting time of 1-hour for all breakdowns including continuous emission monitor events.
