Newspaper notice for publication in Stockton Record and for posting on valleyair.org

**NOTICE OF FINAL DECISION
FOR THE ISSUANCE OF AUTHORITY TO CONSTRUCT AND
SIGNIFICANT MODIFICATION OF FEDERALLY
MANDATED OPERATING PERMIT**

NOTICE IS HEREBY GIVEN that the Air Pollution Control Officer has issued the Authority to Construct permits to Pacific Gas & Electric Company for proposed changes to natural gas dehydration systems, and pipeline condensate transfer and storage operations, at McDonald Island compressor station in Holt, California.

All comments received following the District's preliminary decision on this project were considered.

Comments received by the District during the public notice period resulted in a clarification to the location of components (i.e., valves, connectors, etc.) in the pipeline liquid transfer, storage and loadout operation under permits N-608-32-1 and '-33-1. These changes were minor and did not trigger additional public notification requirements, nor did they have any impact upon the Best Available Control Technology determination or on the amount of offsets required for project approval.

The application review, project # N-1171593, is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm, the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, 4800 ENTERPRISE WAY, MODESTO, CA 95356, and at any other District office. For additional information, please contact the District at (209) 557-6400.
