**I. PROPOSAL**

Barbosa Cabinets, Inc. was issued a Title V permit on November 10, 2014. As required by District Rule 2520, the applicant is requesting a permit renewal. The existing Title V permit shall be reviewed and modified to reflect all applicable District and federal rules updated, removed, or added since the issuance of the initial Title V permit.

The purpose of this evaluation is to provide the legal and factual basis for all updated applicable requirements and to determine if the facility will comply with these updated requirements. It also specifically identifies all additions, deletions, and/or changes made to permit conditions or equipment descriptions.

**II. FACILITY LOCATION**

Barbosa Cabinets, Inc. is located at 2020 E Grant Line Rd, in Tracy, CA.

### III. EQUIPMENT LISTING

A detailed facility printout listing all permitted equipment at the facility is included as Attachment C.

### IV. GENERAL PERMIT TEMPLATE USAGE

The applicant is requesting to use the following model general permit Template:

#### A. Template SJV-UM-0-3 Facility Wide Umbrella

The applicant has requested to utilize template No. SJV-UM-0-3, Facility Wide Umbrella. Based on the information submitted in the Template Qualification Form, the applicant qualifies for the use of this template.

### V. SCOPE OF EPA AND PUBLIC REVIEW

Certain segments of the proposed Renewed Operating Permit are based on model general permit templates that have been previously subject to EPA and public review. The terms and conditions from the model general permit templates are included in the proposed permit and are not subject to further EPA and public review.

For permit applications utilizing model general permit templates, public and agency comments on the District's proposed actions are limited to the applicant's eligibility for model general permit template, applicable requirements not covered by the model general permit template, and the applicable procedural requirements for issuance of Title V Operating Permits.

The following permit conditions, including their underlying applicable requirements, originate from model general permit templates and are not subject to further EPA or public review.

## **VII. REQUIREMENTS NOT FEDERALLY ENFORCEABLE**

For each Title V source, the District issues a single permit that contains the Federally Enforceable requirements, as well as the District-only requirements. The District-only requirements are not a part of the Title V Operating Permits. The terms and conditions that are part of the facility's Title V permit are designated as "Federally Enforceable Through Title V Permit".

For this facility, the following are not federally enforceable and will not be discussed in further detail:

### **A. Rules Added/Updated**

None

**B. Rules Not Updated**

- District Rule 4102, Nuisance (as amended December 17, 1992)
- Title 17 California Code of Regulations (CCR) Section, 93115, Airborne Toxic Control Measure for Stationary Compression Ignition Engines (adopted February 26, 2004)

**VIII. PERMIT REQUIREMENTS**

The purpose of this evaluation is to review changes to federally enforceable requirements; therefore, this compliance section will only address rules that have been amended or added since the issuance of the initial Title V permit or most recent renewal of the Title V permit.

**A. District Rule 2020 - Exemptions**

District Rule 2020 lists equipment which is specifically exempt from obtaining permits and specifies recordkeeping requirements to verify such exemptions.

The amendments to this rule involved the following:

- Revisions to the HAP source definition
- Incorporating additional EPA approved fuel sulfur test methods
- Adding a small producer exemption for heavy oil storage tanks
- Clarifying the existing portable equipment exemption from permits

The amendments to this rule do not have any effect on current permit requirements and will therefore not be addressed in this evaluation.

The following condition on the draft facility-wide permit will ensure compliance with the requirements of this rule.

<b>Renewed Permit</b>	<b>Permit Condition</b>
N-4065-0-3	4

**B. District Rule 2201 - New and Modified Stationary Source Review Rule (NSR)**

District Rule 2201 has been amended since this facility's initial Title V permit was issued. However, the requirements of this rule are only triggered at the time the source undergoes a modification. All applicable requirements from any NSR permit actions have already been incorporated into the current Title V permit, except for the terms from project #1191257 which are being included as part of this Title V permit renewal.

**C. District Rule 2520 - Federally Mandated Operating Permits**

District Rule 2520 has been amended since this Title V permit was issued. The rule was amended to enhance the public notice procedures for District actions that trigger public notification requirements under the existing provisions of the Rule by requiring electronic notification (e-notice) in place of newspaper publication. The amendment was done to be consistent with the EPA action that requires electronic notification (e-notice) in place of newspaper publication for EPA actions and for actions performed by other permitting authorities implementing federal permitting rules. The amendments to this rule do not have any effect on current permit requirements and therefore will not be addressed in this evaluation. However, greenhouse gas emissions will be addressed under Rule 2520 during this renewal.

**Greenhouse Gas Discussion**

There are no federally applicable Greenhouse Gas (GHG) requirements for this source. It should be noted that the Mandatory Greenhouse Gas Reporting rule (40 CFR Part 98) is not included in the definition of an applicable requirement within Title V (per 40 CFR 71.2). Therefore, there will be no further discussion of GHG in this evaluation.

**D. 40 CFR Part 82, Subpart B, Servicing of Motor Vehicle Air Conditioners**

The purpose of 40 CFR Part 82 Subpart B is to implement section 609 of the Clean Air Act, as amended regarding the servicing of motor vehicle air conditioners (MVACs), and to implement section 608 of the Clean Air Act regarding certain servicing, maintenance, repair and disposal of air conditioners in MVACs and MVAC-like appliances.

These regulations apply to any person performing service on a motor vehicle for consideration when this service involves the refrigerant in the motor vehicle air conditioner.

The amendments to this subpart did not have any effect on the current permit requirements and will therefore not be addressed in this evaluation. The following condition on the draft renewed permit is a mechanism to ensure compliance with the requirements of this subpart:

<b>Renewed Permit</b>	<b>Permit Condition</b>
N-4065-0-3	28

**E. 40 CFR Part 82, Subpart F, Recycling and Emission Reductions**

The purpose of 40 CFR Part 82 Subpart F is to reduce emissions of class I and class II refrigerants and their substitutes to the lowest achievable level by maximizing the recapture and recycling of such refrigerants during the service, maintenance, repair, and disposal of appliances and restricting the sale of refrigerants consisting in whole or in part of a class I and class II ODS in accordance with Title VI of the Clean Air Act.

These regulations apply to any person servicing, maintaining, or repairing appliances. This subpart also applies to persons disposing of appliances, including small appliances and motor vehicle air conditioners. In addition, this subpart also applies to refrigerant reclaimers, technician certifying programs, appliance owners and operators, manufacturers of appliances, manufacturers of recycling and recovery equipment, approved recycling and recovery equipment testing organizations, persons selling class I or class II refrigerants or offering class I or class II refrigerants for sale and persons purchasing class I or class II refrigerants.

The amendments to this subpart did not have any effect on the current permit requirements and will therefore not be addressed in this evaluation. The following condition on the draft renewed permit is a mechanism to ensure compliance with the requirements of this subpart:

<b>Renewed Permit</b>	<b>Permit Condition</b>
N-4065-0-3	27

**F. 40 CFR Part 64 - Compliance Assurance Monitoring (CAM)**

40 CFR Part 64 requires Compliance Assurance Monitoring for units that meet the following three criteria:

- 1) the unit must have an emission limit for the pollutant;
- 2) the unit must have add-on controls for the pollutant; these are devices such as flue gas recirculation (FGR), baghouses, and catalytic oxidizers; and
- 3) the unit must have a pre-control potential to emit of greater than the major source thresholds.

<b>Pollutant</b>	<b>Major Source Threshold (lb/year)</b>
NO <sub>x</sub>	20,000
SO <sub>x</sub>	140,000
PM <sub>10</sub>	140,000
CO	200,000
VOC	20,000

- a. N-4065-5-5: WOODWORKING OPERATION CONSISTING OF 23 SAWS, 8 BORING MACHINES, 5 SANDERS, 24 SHAPERS, AND 2 GRINDERS ALL SERVED BY AN LMC MODEL 594-LP-12 BAGHOUSE. WHEN OPERATING ALONE, THE COUNTERTOP MANUFACTURING PORTION OF THE EQUIPMENT WILL BE SERVED BY THE LMC 594-LP-12 BAGHOUSE OR AN LMC 360 IRWD 915 RBO 36-15 BAGHOUSE. THE COUNTERTOP MANUFACTURING OPERATION CONSISTS OF 8 OF THE ABOVE LISTED SAWS AND TWO OF THE ABOVE LISTED SHAPERS:

This permit unit has two emissions units, each with an emission limit and an add-on control device (baghouse) for PM10.

Woodworking operation/LMC Model 594-LP-12 Baghouse:

The post-control PE = 90,000 dscfm x 0.003 gr/dscf x (1 lb/7,000 gr) x 1,440 min/day x 365 days/yr = 20,273 lb/yr.

Considering a baghouse control efficiency of 99%<sup>1</sup>, the pre-control PE = 20,273 lb/yr / (1 - 0.99) = 2,027,300 lb/yr.

Countertop manufacturing operation/LMC 360 IRWD 915 RBO 36-15 Baghouse:

The post-control PE = 4,800 dscfm x 0.004 gr/dscf x (1 lb/7,000 gr) x 1,440 min/day x 365 days/yr = 1,442 lb/yr.

Considering a baghouse control efficiency of 99%<sup>2</sup>, the pre-control PE = 1,442 lb/yr / (1 - 0.99) = 144,200 lb/yr.

Since the pre-control PE is greater than the PM10 major source threshold (140,000 lb/yr) for both emissions units, CAM is applicable to both units.

Monitoring interval: Since the post-control annual emissions do not exceed the major source threshold, a once-daily monitoring interval is sufficient to determine compliance with CAM.

<sup>2</sup> <http://www.epa.gov/ttn/catc/dir1/ff-shaker.pdf>

Woodworking operation/LMC Model 594-LP-12 Baghouse:

This permit unit will implement the requirements of CAM by monitoring PM10 emissions using visible emissions evaluation as a surrogate, in conjunction with monitoring of the baghouse differential pressures to provide supplemental indication of PM10 emission control performance.

The monitoring design criteria of §64.3 are satisfied by proposed conditions 7, 8, 9, and 18.

The requirements of §64.7 (operation of approved monitoring) are satisfied by proposed conditions 19, 20 and 21.

The requirements of §64.8 (quality improvement plan) are satisfied by proposed condition 21.

The requirements of §64.9 (reporting and recordkeeping) are satisfied by proposed condition 22.

Countertop manufacturing operation/LMC 360 IRWD 915 RBO 36-15 Baghouse:

Thus, the monitoring design criteria of §64.3 and the submittal requirements of §64.4 and §64.5 will be satisfied by proposed condition 23.

- b. N-4065-6-5: WOODWORKING OPERATION CONSISTING OF 34 SAWS, 14 BORING MACHINES, 2 EDGE BANDERS, 13 SANDERS AND 4 SHAPERS AND FILTER CLEANING BOOTH ALL SERVED BY AN LMC MODEL 594-LP-12 BAGHOUSE

This unit has an emission limit and an add-on control device (baghouse) for PM10.

The post-control PE = 90,000 dscfm x 0.003 gr/dscf x (1 lb/7,000 gr) x 1,440 min/day x 365 days/yr = 20,273 lb/yr.

Considering a baghouse control efficiency of 99%<sup>3</sup>, the pre-control PE = 20,273 lb/yr / (1 - 0.99) = 2,027,300 lb/yr.

Since the pre-control PE is greater than the PM10 major source threshold (140,000 lb/yr), CAM is applicable to this unit.

<sup>3</sup> <http://www.epa.gov/ttn/catc/dir1/ff-shaker.pdf>

Monitoring interval: Since the post-control annual emissions do not exceed the major source threshold, a once-daily monitoring interval is sufficient to determine compliance with CAM.

This permit unit will implement the requirements of CAM by monitoring PM10 emissions using visible emissions evaluation as a surrogate, in conjunction with monitoring of the baghouse differential pressure to provide supplemental indication of PM10 emission control performance.

The monitoring design criteria of §64.3 are satisfied by proposed conditions 4, 5, 6, and 15.

The requirements of §64.7 (operation of approved monitoring) are satisfied by proposed conditions 16, 17 and 18.

The requirements of §64.8 (quality improvement plan) are satisfied by proposed condition 20.

The requirements of §64.9 (reporting and recordkeeping) are satisfied by proposed condition 19.

Coating booths:

The coating booths are not equipped with any add-on controls and are therefore not subject to CAM.

Sanding booth:

The sanding operation has an emission limit and an add-on control device (baghouse) for PM10 emissions.

The post-control PE = 0.0093 lb/lb sawdust x 100 lb sawdust/day x 365 days/yr = 339 lb/yr.

Considering a baghouse control efficiency of 99%, the pre-control PE = 339 lb/yr / (1 - 0.99) = 33,900 lb/yr.

Since the pre-control PE is not greater than the PM10 major source threshold (140,000 lb/yr), CAM is not applicable to this unit.

- j. N-4065-14-2: SANDING BOOTH SERVED BY A TORIT ECB DUST COLLECTOR

- k. N-4065-15-2: SANDING BOOTH SERVED BY A TORIT ECB DUST COLLECTOR

Each unit has an emission limit and an add-on control device (baghouse) for PM10.

The post-control PE = 0.0093 lb/lb of sawdust x 100 lb sawdust/day x 365 days/yr = 339 lb/yr.

Considering a baghouse control efficiency of 99%, the pre-control PE = 339 lb/yr / (1 - 0.99) = 33,900 lb/yr.

Since the pre-control PE is less than the PM10 major source threshold (140,000 lb/yr), CAM is not applicable to these units.

- I. N-4065-16-2: 325 BHP PERKINS MODEL 1306-E87TA DIESEL-FIRED EMERGENCY STANDBY IC ENGINE POWERING AN ELECTRICAL GENERATOR

Since this unit is not equipped with any add-on controls, it is not subject to CAM.

## **IX. PERMIT SHIELD**

A permit shield legally protects a facility from enforcement of the shielded regulations when a source is in compliance with the terms and conditions of the Title V permit. Compliance with the terms and conditions of the Operating Permit is considered compliance with all applicable requirements upon which those conditions are based, including those that have been subsumed.

### **A. Requirements Addressed by Model General Permit Templates**

1. Model General Permit Template SJV-UM-0-3

By submitting Model General Permit Template SJV-UM-0-3 qualification form, the applicant has requested that a permit shield be granted for all the applicable requirements identified by the template. Therefore, the permit shields as granted in Model General Permit Template is included as conditions 38 and 39 of the facility-wide requirements (N-4065-0-3).

### **B. Requirements not Addressed by Model General Permit Templates**

This Title V permit renewal application does not include any proposals for new permit shields or modifications to any pre-existing permit shields. The proposed renewed Title V permit therefore does not include any new or modified permit shields.

## **X. CALIFORNIA ENVIRONMENTAL QUALITY ACT**

The purpose of the Title V permit renewal is to update the permit to ensure that any changes to regulations since the issuance of the initial Title V permit or most recent renewal of the Title V permit are incorporated as permit requirements.

Per the California Environmental Quality Act (CEQA) Statute §21080.24, and CEQA Guidelines §15281, the issuance, modification, amendment, or renewal of any permit by an air pollution control district or air quality management district

pursuant to Title V is exempt from CEQA, unless the issuance, modification, amendment, or renewal authorizes a physical or operational change to a source or facility. There will be no physical or operational change to the source or facility nor will the Title V permit renewal authorize a physical or operational change to the source or facility. Therefore, this project, a Title V permit renewal, is subject to a ministerial action that is exempt from CEQA.

17. The permittee has the option of utilizing an oil analysis program in order to extend the specified oil change requirement in Tables 2c and 2d of Subpart ZZZZ. The oil analysis must be performed at the same frequency specified for changing the oil in Table 2c or 2d to this subpart. The analysis program must at a minimum analyze the following three parameters: Total Base Number, viscosity, and percent water content. The condemning limits for these parameters are as follows: Total Base Number is less than 30 percent of the Total Base Number of the oil when new; viscosity of the oil has changed by more than 20 percent from the viscosity of the oil when new; or percent water content (by volume) is greater than 0.5. If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine.
