

**NOTICE OF FINAL DECISION
FOR THE ISSUANCE OF AUTHORITY TO CONSTRUCT AND
SIGNIFICANT MODIFICATION OF FEDERALLY
MANDATED OPERATING PERMIT**

NOTICE IS HEREBY GIVEN that the Air Pollution Control Officer has issued the Authority to Construct permit to Vie-Del Winery #1 for the modification of an existing 60 MMBtu/hr natural gas-fired boiler (permit unit C-1344-7) to tune the existing Haldor Topsoe model DNX-929 Selective Catalytic Reduction (SCR) system in order to meet the 2.5 ppmv NO_x emission limit of District Rule 4320, at 11903 S Chesnut Ave, Fresno.

All comments received following the District's preliminary decision on this project were considered.

Comments received by the District during the public notice period resulted in the correction of the calculated daily Post-Project Potential to Emit (PE₂) value for VOC emissions from 88.7 lb/day to 7.9 lb/day (reference page 8 of the attached engineering evaluation). These changes were minor and did not trigger additional public notification requirements, nor did they have any impact upon the Best Available Control Technology determination or on the amount of offsets required for project approval.

The application review, project # C-1220078, is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm, the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, 4800 ENTERPRISE WAY, MODESTO, CA 95356, and at any other District office. For additional information, please contact the District at (209) 557-6400.
