

**NOTICE OF FINAL ACTION
FOR THE ISSUANCE OF
AUTHORITY TO CONSTRUCT PERMITS**

NOTICE IS HEREBY GIVEN that the Air Pollution Control Officer has issued the Authority to Construct permit to County of Fresno for the installation of a 1,220 bhp Tier 4F compliant diesel-fired emergency standby internal combustion (IC) engine equipped with a Selective Catalytic Reduction system, Diesel Particulate Filter, and Diesel Oxidation Catalyst powering an electrical generator, at 1129 N Armstrong Ave, Fresno, CA.

All comments received following the District's preliminary decision on this project were considered.

Comments received by the District during the public notice period resulted in the correction of the equipment description to refer to the engine as a Tier 4F compliant engine. These changes were minor and did not trigger additional public notification requirements, nor did they have any impact upon the Best Available Control Technology determination or on the amount of offsets required for project approval.

The application review for Project # C-1223902 is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm, the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, 4800 ENTERPRISE WAY, MODESTO, CA 95356, and at any other District office. For additional information, please contact the District at (209) 557-6400.
