

## **Tulare County air quality 'unhealthy' today**

Visalia Times Delta, Wednesday, Dec. 25, 2013

Tulare County's air quality will dip into the unhealthy range as unusually warm temperatures continue this weekend.

The latest forecast from the San Joaquin Valley Air Pollution Control District calls for unhealthy air in Tulare and Kings counties as a ridge of high pressure allows soot and dust to accumulate. Wood burning is prohibited throughout the San Joaquin Valley today.
