

**SJVAPCD**  
**Summary of Action Items for**  
**Permit Stakeholder Meeting**

From Meeting Held on May 30, 2012  
1:30 pm

**Action Items Summary**

Item	Action	Status
1	Stakeholders ask that the District enhance the ability to track changes to permit conditions made through permitting actions. Based on suggestions from stakeholders, the District has created a programming task to enhance our permit administration system (PAS) with this functionality. The District set up a subcommittee (with District programmers) to explore solutions to help facilities track changes to permit conditions. One suggestion is to separate any new/changed conditions by adding to the end of the permit to aid in identifying the changes from the previous Title V permit reporting requirements. In the meantime, a beta permit tracking access program has been developed and shared with interested stakeholders. The District seeks feedback on this tracking program. (Marjollet)	On hold until this item obtains District programming resources.
2	Annual Offset Equivalency Demonstration – Put together mailing list of stakeholders inviting them to discuss solutions. Meeting forthcoming. (Warner)	District will compile list and invite stakeholders to meeting.
3	Look into how EPA deals with a test method change including changing ASTM method to another. These test method specifications are included in rules. Explore possible flexibility with use of alternative test methods. Categorize industry's specific test method examples and provide potential paths to streamline. Look how other District addressed issue. Discuss at next meeting. (Garcia)	District will discuss at next meeting.
4	Assure Permit Consistency on similar permit types that are subject to the same requirements; stakeholders to provide examples of permits or conditions that have inconsistent language (Warner)	Ongoing. Send examples to Dave Warner.
5	Categorize/group together the various types of permit conditions, such as adding headings to groups of permit conditions of similar types (e.g. operational conditions, emission limits, testing requirements, monitoring, recordkeeping, etc.). (Warner)	Ongoing.
6	Send out link to EPA's fact sheet on proposal to ZZZZ; opportunities for comments; include ZZZZ deadlines. Keep abreast of time changes on ZZZZ. Look at streamlining permit changes with EPA's new proposal. (Garcia)	Email sent to group on proposed ZZZZ. <a href="http://www.epa.gov/ttn/atw/rice/ri-cepg.html">http://www.epa.gov/ttn/atw/rice/ri-cepg.html</a> Final regulation will follow.

7	<p>NSPS OOOO (Crude Oil and Natural Gas Production, Transmission, and Distribution) was signed, but still has not been placed in the Federal Register. It affects oil, gas, glycol equipment, etc. built on or after 8/23/2011. What is the District doing with NSPS OOOO? (Scandura)</p>	<p>Stakeholders were sent a District Summary:  <a href="http://www.valleyair.org/busind/draft-policies/Federaloilandgasregs2012-execsummary.pdf">http://www.valleyair.org/busind/draft-policies/Federaloilandgasregs2012-execsummary.pdf</a></p> <p>District is developing and will discuss at next meeting a document that outlines in more detail the various requirements.</p>
8	<p>Send a meeting reminder a month ahead of the next Permit Stakeholder meeting (Garcia)</p>	<p>Sent out with NSPS OOOO email.</p>
