

**COMPLIANCE ASSISTANCE BULLETIN**  
**JULY 2007**

***Rule 1081 - SOURCE SAMPLING***

This advisory is to notify source test contractors that a completed copy of the **CARB Method 100 Quality Assurance Worksheet (Appendix G)** will be required with all test reports for all tests conducted within the SJVAPCD on or after **August 24, 2007**. The test report will not be accepted without the worksheet. The data must be submitted on a floppy disc or CD with the test report.

Please note that Appendix G does not replace the tester's Data Summary page. A hardcopy printout of the completed spreadsheet must also be included in the data summary section at the beginning of the report for each unit tested that is equipped with continuous emission monitors.

If conditions of the Permit to Operate or Authority to Construct under which the test is conducted require the source to maintain daily, monthly, quarterly, or annual fuel use, sulfur, or production records, those data must be entered into the spreadsheet as well. Data need only be entered for last full day of data nearest the test, and for one additional day that is closest to 3, 6, or 9 months prior to the test date. Hardcopies of these records must also be submitted with the source test report.

Copies of Appendix G may be obtained on the District website [www.valleyair.org](http://www.valleyair.org) under Compliance Assistance/Source Testing or by email from Denise Holmes [denise.holmes@valleyair.org](mailto:denise.holmes@valleyair.org). Questions about Appendix G should be addressed to Denise Holmes or Creighton Smith at 661-326-6900.
