A. DRAFT RENEWED TITLE V OPERATING PERMIT
B. PREVIOUS TITLE V OPERATING PERMIT
C. DETAILED FACILITY LIST
I. PROPOSAL

Browning Ferris Industries' Chateau Fresno Landfill Facility @ Fresno was issued a Title V permit on September 6, 2000 and was renewed on August 17, 2005. As required by District Rule 2520, the applicant is requesting a permit renewal. The existing Title V permit shall be reviewed and modified to reflect all applicable District and federal rules updated, removed, or added since the last permit renewal.

The purpose of this evaluation is to provide the legal and factual basis for all updated applicable requirements and to determine if the facility will comply with these updated requirements. It also specifically identifies all additions, deletions, and/or changes made to permit conditions or equipment descriptions.

II. FACILITY LOCATION

Chateau Fresno Landfill Facility @ Fresno is located at 8622 W. Muscat Fresno, CA.
III. EQUIPMENT LISTING

A detailed facility printout listing all permitted equipment at the facility is included as Attachment C.

IV. GENERAL PERMIT TEMPLATE USAGE

The applicant does not propose to use any model general permit templates.

V. SCOPE OF EPA AND PUBLIC REVIEW

Certain segments of the proposed Renewed Operating Permit are based on model general permit templates that have been previously subject to EPA and public review. The terms and conditions from the model general permit templates are included in the proposed permit and are not subject to further EPA and public review.

For permit applications utilizing model general permit templates, public and agency comments on the District's proposed actions are limited to the applicant's eligibility for model general permit template, applicable requirements not covered by the model general permit template, and the applicable procedural requirements for issuance of Title V Operating Permits.

The following permit conditions, including their underlying applicable requirements, originate from model general permit templates and are not subject to further EPA or public review.

The applicant is not requesting any model general permit templates. Therefore, all federally enforceable conditions in this current Title V permit will be subject to EPA and public review.

VII. REQUIREMENTS NOT FEDERALLY ENFORCEABLE

For each Title V source, the District issues a single permit that contains the Federally Enforceable requirements, as well as the District-only requirements. The District-only requirements are not a part of the Title V Operating Permits. The terms and conditions that are part of the facility’s Title V permit are designated as “Federally Enforceable Through Title V Permit”.

The following rule, which has not been updated since the last Title V permit renewal, is not federally enforceable and will not be discussed in further detail:
District Rule 4102 – Nuisance

This rule is applicable to any source operation which emits or may emit air contaminants or other materials. This rule stipulates that a person shall not discharge from any source whatsoever such quantities of air contaminants or other materials which cause injury, detriment, nuisance or annoyance to any considerable number of persons or to the public or which endanger the comfort, repose, health or safety of any such person or the public or which cause or have a natural tendency to cause injury or damage to business or property.

The following permit requirements, which are based on this rule, were addressed as follows:

a. C-150-0-3 – Facilitywide Requirements
   - Condition 39 on the existing permit to operate has not been modified.

VIII. PERMIT REQUIREMENTS

The purpose of this evaluation is to review changes to federally enforceable requirements; therefore, this compliance section will only address rules that have been amended or added since the issuance of the initial Title V permit.

A. District Rule 2201 - New and Modified Stationary Source Review Rule

District Rule 2201 has been amended since this facility's last Title V permit renewal. This Title V permit renewal does not constitute a modification per section 3.26, defined as an action including at least one of the following items:

1) Any change in hours of operation, production rate, or method of operation of an existing emissions unit, which would necessitate a change in permit conditions.
2) Any structural change or addition to an existing emissions unit which would necessitate a change in permit conditions. Routine replacement shall not be considered to be a structural change.
3) An increase in emissions from an emissions unit caused by a modification of the Stationary Source when the emissions unit is not subject to a daily emissions limitation.
4) Addition of any new emissions unit which is subject to District permitting requirements.
5) A change in a permit term or condition proposed by an applicant to obtain an exemption from an applicable requirement to which the source would otherwise be subject.

Therefore, the updated requirements of this rule are not applicable at this time.
Authority to Construct (ATC) # C-150-1-5 was issued on 2/25/08 to allow up to 15% 02 on 36 perimeter well heads. Conditions 25 & 26 have been included to the draft TV permit # C-150-1-6.

B. District Rule 4101 - Visible Emissions

District Rule 4101 was approved by EPA on August 11, 2005 to replace SIP approved Rule 401 (all counties of the SJVUAPCD).

Section 5.0 prohibits the discharge of any air contaminant for a period or periods aggregating more than 3 minutes in any one hour which is as dark or darker in shade as that designated as No. 1 on the Ringelmann Chart; or is of such opacity as to obscure an observer's view to a degree equal to or greater than the smoke described in Section 5.1 of Rule 4101.

The following permit requirement, which is based on this rule, has been revised as follows:

a. C-150-0-3 – Facilitywide Requirements

- Condition 22 on the existing permit to operate has been revised to update the rule amendment date referenced in the condition text, and to remove the superceded County Rule 401 from the citation section.

C. District Rule 4311 – Flares

This rule applies to the operation of flares to limit the emissions of volatile organic compounds (VOC) and oxides of nitrogen (NOx).

Section 4.2 states that flares subject to the requirements of 40 CFR 60 Subpart Cc, Emission Guidelines and Compliance Times for Municipal Solid Waste Landfills, are exempt from this rule. Therefore, the requirements of this rule do not apply to permit unit C-150-1-4.

D. District Rule 4601 – Architectural Coatings

District Rule 4601 was approved by EPA on January 2, 2004 to become part of the District's SIP. The existing permit conditions are based on the SIP-approved version of the rule (amended 10/31/01), but the permit condition for sections 6.1 and 6.3 of the rule was omitted. The missing condition has been added to the permit as follows:
Chateau Fresno Landfill Facility @ Fresno
C-150
C-1084002

a. C-150-0-3—Facilitywide Requirements

- New condition 45 has been added to the existing permit to ensure compliance with section 5.2 of the rule.
- New condition 41 has been added to the existing permit to ensure compliance with section 5.5 of the rule.

E. 40 CFR Part 60—Subpart Cc

The subpart applies to each existing municipal solid waste (MSW) landfill for which construction, reconstruction, or modification was commenced before May 30, 1991.

This subpart does apply since this is a municipal solid waste (MSW) landfill for which construction, reconstruction, or modification was commenced before May 30, 1991. However, this landfill gas collection system has not been source tested. Conditions 26-28 have been added to the permit renewal of C-150-1-6 to verify compliance with 40 CFR 60 Cc. The source shall be source tested within 90 days of permit renewal issuance.

F. 40 CFR Part 60—Subpart WWW

The requirements of this subpart apply to each existing municipal solid waste landfill for which construction, reconstruction, or modification was commenced on or after May 30, 1991. Sections 60.752 (b)(2)(iii)(A) and 60.754(e) were amended in September 21, 2006. The amendment applies to the operation of open flares and requires that Method 3C is used to determine the concentration of methane in the landfill gas. This change does not affect this facility because it has an enclosed flare.

a. C-150-2-2, 4.6 Million Megagram Capacity Landfill with Landfill Gas Collection System

- Conditions 1 through 23 ensure compliance with the requirements of this rule.

G. 40 CFR Part 61, Subpart M, National Emission Standard for Asbestos

These regulations apply to demolition or renovation activity, as defined in 40 CFR 61.141. 40 CFR Section 61.150 of this Subpart was amended September 18, 2003, and condition 37 of C-150-0-3 assures compliance with the requirements.

H. 40 CFR Part 63—Subpart AAAA—Municipal Solid Waste Landfills Standards

This subpart establishes national emission standards for hazardous air pollutants for existing and new municipal solid waste (MSW) landfills. MSW landfill must comply
with the requirements of 40 CFR 60 subpart WWW. In addition, MSW landfills that are new affected source (an affected source that commenced construction or reconstruction after November 7, 2000) and is a major source must comply with the requirements of 40 CFR 63.1955(b) and 63.1960 through 63.1980 by the date the landfill installs a collection and control system as required by 49 CFR 60.752(b)(2) of subpart WWW.

a. C-150-2-2, 4.6 Million Megagram Capacity Landfill with Landfill Gas Collection System

- Conditions 21 and 23 ensure compliance with the requirements of this rule.

I. 40 CFR Part 82, Subparts B and F, Stratospheric Ozone

These regulations apply to servicing motor vehicles when this service involves the ozone-depleting refrigerant in the motor vehicle air conditioner (MVAC). Sections of this regulation were amended in 2007 and 2008, and conditions 27 and 28 of C-150-0-3 assure compliance with the requirements.

IX. PERMIT SHIELD

A permit shield legally protects a facility from enforcement of the shielded regulations when a source is in compliance with the terms and conditions of the Title V permit. Compliance with the terms and conditions of the Operating Permit is considered compliance with all applicable requirements upon which those conditions are based, including those that have been subsumed.

A. Requirements Addressed by Model General Permit Templates

The applicant does not propose to use any model general permit templates.

B. Requirements not Addressed by Model General Permit Templates

There are no permit shields in the existing permit requirements.

Support information includes copies of all reports required by the permit and, for continuous monitoring instrumentation, all calibration and maintenance records and all original strip-chart recordings. [District Rule 2520, 9.4.2] Federally Enforceable Through Title V Permit
