Re: Notice of Preliminary Decision - Federally Mandated Operating Permit
District Facility # S-381
Project # S-1110990

Dear Mr. Ruhland:

Enclosed for your review and comment is the District's analysis of Heck Cellars' application for the Federally Mandated Operating Permit for its winery, 15401 Bear Mountain Winery Road, Di Giorgio, California.

The notice of preliminary decision for this project will be published approximately three days from the date of this letter. Please submit your written comments on this project within the 30-day comment period which begins on the date of publication of the public notice.

Thank you for your cooperation in this matter. If you have any questions regarding this matter, please contact Mr. Jim Swaney, Permit Services Manager, at (559) 230-5900.

Sincerely,

David Warner
Director of Permit Services

NOTICE OF PRELIMINARY DECISION
FOR THE PROPOSED ISSUANCE OF
FEDERALLY MANDATED OPERATING PERMITS

NOTICE IS HEREBY GIVEN that the San Joaquin Valley Air Pollution Control District solicits public comment on the proposed issuance of the Federally Mandated Operating permits to Heck Cellars for its winery, 15401 Bear Mountain Winery Road, Di Giorgio, California.

The District’s analysis of the legal and factual basis for this proposed action, project #S-1110990, is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm and the District office at the address below. There are no emission changes associated with this proposed action. This will be the public’s only opportunity to comment on the specific conditions of the proposed Federally Mandated Operating initial permits. If requested by the public, the District will hold a public hearing regarding issuance of this initial permit. For additional information, please contact Mr. Jim Swaney, Permit Services Manager, at (559) 230-5900. Written comments on the proposed initial permit must be submitted within 30 days of the publication date of this notice to DAVID WARNER, DIRECTOR OF PERMIT SERVICES, SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, 1990 E. GETTYSBURG AVE, FRESNO, CALIFORNIA 93726-0244.

TITLE V APPLICATION REVIEW

Project #: S-1110990
Deemed Complete: April 15, 2011

Engineer: Juscelino Siongco
Date: August 23, 2012

Facility Number: S-381
Facility Name: Heck Cellars
Mailing Address: 15401 Bear Mountain Winery Rd
Di Giorgio, CA 93203

Contact Name: Guy Ruhland
Phone: (661) 854-6120

Responsible Official: Guy Ruhland
Title: Winery Manager

I. PROPOSAL

Heck Cellars is proposing that an initial Title V permit be issued for its winery at 15401 Bear Mountain Winery Road in Di Giorgio, Kern County, CA. The purpose of this evaluation is to identify all applicable requirements, determine if the facility will comply with those applicable requirements, and to provide the legal and factual basis for proposed permit conditions.

II. FACILITY LOCATION

Heck Cellars is located at 15401 Bear Mountain Winery Road, Di Giorgio in Kern County, CA.

III. EQUIPMENT LISTING

A detailed facility printout listing all permitted equipment at the facility is shown in Attachment A.

A summary of the exempt equipment categories which describe the insignificant activities or equipment at the facility not requiring a permit is shown in Attachment B. This equipment is not exempt from facility-wide requirements.

IV. GENERAL PERMIT TEMPLATE USAGE

The applicant has chosen to not use any model general permit templates.
V. SCOPE OF EPA AND PUBLIC REVIEW

The applicant has not requested to utilize any model general permit templates. Therefore, the proposed permit in its entirety is subject to EPA and public review.

VI. REQUIREMENTS ADDRESSED BY GENERAL PERMIT TEMPLATES

The applicant has not proposed to utilize any model general permit templates. All applicable requirements are explicitly addressed in the permit outside of the general permit templates.

VII. REQUIREMENTS NOT ADDRESSED BY GENERAL PERMIT TEMPLATES

District Rule 1080, Stack Monitoring (amended December 17, 1992)
District Rule 1081, Source Sampling (amended December 16, 1993)
District Rule 1100, Equipment Breakdown (amended December 17, 1992) (Non-SIP replacement for Fresno County Rule 110)
District Rule 1160, Emission Statements (adopted November 18, 1992)
District Rule 2010, Permits Required (amended December 17, 1992)
District Rule 2020, Exemptions (amended August 18, 2011)
District Rule 2031, Transfer of Permits (amended December 17, 1992)
District Rule 2040, Applications (amended December 17, 1992)
District Rule 2070, Standards for Granting Applications (amended December 17, 1992)
District Rule 2080, Conditional Approval (amended December 17, 1992)
District Rule 2201, New and Modified Stationary Source Review Rule (amended April 21, 2011)
District Rule 2520, Federally Mandated Operating Permits (amended June 21, 2001)
District Rule 4305, Boilers, Steam Generators, and Process Heaters—Phase 2 (amended August 21, 2003)
District Rule 4320, Advanced Emission Reduction Options for Boilers, Steam Generators, and Process Heaters Greater than 5.0 MMBtu/hr (amended October 16, 2008)
District Rule 4101, Visible Emissions (amended February 17, 2005)
District Rule 4201, Particulate Matter Concentration (amended December 17, 1992)
District Rule 4601, Architectural Coatings (amended December 17, 2009)
District Rule 4694, Wine Fermentation and Storage Tanks (adopted December 15, 2005)
District Rule 4701, Internal Combustion Engines – Phase 1 (amended August 21, 2003)
District Rule 4702, Internal Combustion Engines (amended August 18, 2011)
District Rule 8011, General Requirements (amended August 19, 2004)
District Rule 8021, Construction, Demolition, Excavation, and Other Earthmoving Activities (amended August 19, 2004)
District Rule 8031, Bulk Materials (amended August 19, 2004)
District Rule 8041, Carryout and Trackout (amended August 19, 2004)
District Rule 8051, Open Areas (amended August 19, 2004)
District Rule 8061, Paved and Unpaved Roads (amended August 19, 2004)
40 CFR Part 60, Subpart Dc, Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units
40 CFR Part 60, Subpart IIII, Standards of Performance for Stationary Compression Ignition Internal Combustion Engines
40 CFR Part 61, Subpart M, National Emission Standard for Asbestos
40 CFR Part 64, Compliance Assurance Monitoring (CAM)
40 CFR Part 82, Subpart B and F, Stratospheric Ozone

VIII. REQUIREMENTS NOT FEDERALLY ENFORCEABLE

For each Title V source, the District issues a single permit that contains the Federally Enforceable requirements, as well as the District-only requirements. The District-only requirements are not a part of the Title V Operating Permits. The terms and conditions that are part of the facility’s Title V permit are designated as Federally Enforceable through Title V Permit.

This facility is subject to the following rules that are not currently federally enforceable:
District Rule 4102 – Nuisance

This rule prevents the discharge from any source whatsoever such quantities of air contaminants or other materials which cause injury, detriment, nuisance or annoyance to any considerable number of persons or to the public or which endanger the comfort, repose, health or safety of any such person or the public or which cause or have a natural tendency to cause injury or damage to business or property.

a. S-381-0-1 – Facility-Wide Requirements

  • Condition 39 on the proposed permit complies with this rule.

District Rule 4694 – Wine Fermentation and Storage Tanks

The purpose of this rule is to reduce emissions of volatile organic compounds (VOC) from the fermentation and bulk storage of wine, or achieve equivalent reductions from alternative emission sources. The rule is applicable to any facility with VOC emissions in excess of 10 tons per year. For those facilities to which the rule applies, the requirements of the rule are applicable to any fermentation or storage tank with capacity in excess of 5,000 gallons. The rule was adopted on December 15, 2005 and submitted to EPA for approval into the State Implementation Plan (SIP).

On August 18, 2011, the District approved an amended SIP submittal which excludes the fermentation provisions of the rule while maintaining the storage provisions. Therefore, the fermentation provisions are not federally enforceable. All other provisions are federally enforceable and will be discussed in Section IX of this application review under District Rule 4694.

a. S-381-0-1 – Facility-Wide Requirements

  Conditions 40 through 44 on the proposed permit are based on the wine fermentation provisions of District Rule 4694 and therefore, are not federally enforceable.

- Condition 8 on the proposed permits is based on the fermentation provisions of the rule and is not federally enforceable.

- Condition 8 on the proposed permits is based on the fermentation provisions of the rule and is not federally enforceable.

- Condition 8 on the proposed permits is based on the fermentation provisions of the rule and is not federally enforceable.

**Title 17 CCR, Section 93115 - Airborne Toxic Control Measure (ATCM) for Stationary Compression-Ignition (CI) Engines**

The purpose of this rule is to reduce diesel particulate matter (PM) and criteria pollutant emissions from stationary diesel-fueled compression ignition engines.

a. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

- Conditions 3, 5, 7, 10, 11, and 12 on the requirements for this permit unit comply with this rule.

b. S-381-11-1: 240 bhp Clarke Model JU6H-UF60 Tier 2 Certified Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

- Conditions 2, 4, 6, 8, and 9 on the requirements for this permit unit comply with this rule.
IX. COMPLIANCE

A. Requirements Addressed by Model General Permit Templates

1. Facility Wide Requirements

The applicant proposes not to utilize any model general permit templates. All applicable requirements are addressed in the following sections.

B. Requirements Not Addressed by Model General Permit Templates

1. District Rule 1080 – Stack Monitoring

This rule grants the District the authority to request the installation, use, maintenance, and inspection of continuous monitoring equipment. The general, source, and pollutant specific requirements for continuous monitoring equipment are defined. This rule also specifies the performance standards for the equipment and administrative recordkeeping, reporting, and violation and equipment breakdown notification requirements.

a. S-381-10-3: 33,310 Barrel Capacity Brandy Storage and Aging Operation (Buildings K & L) Served by a 0.289 MMBtu/hr Adwest Technologies Model Retox 1.0 RTO95 Primary Regenerative Thermal Oxidizer (Small RTO) and 1.156 MMBtu/hr Adwest Technologies Model Retox 4.0 RTO95 Secondary RTO (Large RTO)

   • Conditions 15 and 20 on the requirements for this permit unit comply with this rule.

2. District Rule 1081 – Source Sampling

The purpose of this rule is to ensure that any source operation which emits or may emit air contaminants provides adequate and safe facilities for use in sampling to determine compliance. This rule also specifies methods and procedures for source testing, sample collection, and compliance determination.

a. S-381-9-2: 26 MMBtu/hr Natural Gas-Fired Boiler with FGR, Zinc Rapid Mix FRMB 19-G-600 Low NOx Burner

   • Conditions 13, 14, and 15 on the requirements for this permit unit comply with this rule.
b. S-381-10-3: 33,310 Barrel Capacity Brandy Storage and Aging Operation (Buildings K & L) Served by a 0.289 MMBtu/hr Adwest Technologies Model Retox 1.0 RTO95 Primary Regenerative Thermal Oxidizer (Small RTO) and 1.156 MMBtu/hr Adwest Technologies Model Retox 4.0 RTO95 Secondary RTO (Large RTO)

- Conditions 31 and 32 on the requirements for this permit unit comply with this rule.

3. District Rule 1100 – Equipment Breakdown

This rule defines a breakdown condition and the procedures to follow if one occurs. The corrective action, the issuance of an emergency variance, and the reporting requirements are also specified. Sections 6.0 and 7.0 prescribe breakdown procedures and reporting requirements. District Rule 1100 has been submitted to the EPA to replace Kern County Rule 111 that is in the State Implementation Plan (SIP). District Rule 1100 is at least as stringent as the county SIP rule addressing breakdowns, as shown in following.

Comparison of District Rule 1100 to Kern County Rule 111

<table>
<thead>
<tr>
<th>REQUIREMENTS</th>
<th>District Rule 1100</th>
<th>Kern Rule 111</th>
</tr>
</thead>
<tbody>
<tr>
<td>A breakdown occurrence must be reported as soon as reasonably possible but no later than 1 hour after detection.</td>
<td>X</td>
<td>X</td>
</tr>
<tr>
<td>A variance must be obtained if the occurrence will last longer than a production run or 24 hours, whichever is shorter (96 hours for CEM systems).</td>
<td></td>
<td>X</td>
</tr>
<tr>
<td>A report must be submitted to the APCO within 10 days of the correction of the breakdown occurrence which includes:</td>
<td></td>
<td>X</td>
</tr>
<tr>
<td>1) A statement that the breakdown condition has been corrected, together with the date of correction and proof of compliance.</td>
<td>X</td>
<td>X</td>
</tr>
<tr>
<td>2) A specific statement of the reason(s) or cause(s) for the occurrence sufficient to enable the APCO to determine whether the occurrence was a breakdown condition.</td>
<td>X</td>
<td>X</td>
</tr>
<tr>
<td>3) A description of the corrective measures undertaken and/or to be undertaken to avoid such an occurrence in the future.</td>
<td></td>
<td>X</td>
</tr>
<tr>
<td>4) Pictures of the equipment or controls which failed if available.</td>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

a. S-381-0-1: Facility-Wide Requirements

- Conditions 1 and 2 on the requirements for the proposed permit comply with this rule.
4. District Rule 1160 – Emission Statements

The purpose of this rule is to provide the District with an accurate accounting of emissions from significant sources with which the District and California EPA Air Resources Board (ARB) can compile an accurate inventory. Section 5.0 requires the owner or operator of any stationary source to provide the District with a written emissions statement showing actual emissions of reactive organic gases (ROGs) and nitrogen oxides (NOx) from that source. The District waives this requirement for sources emitting less than 25 tons per year of these pollutants if the District provides the Air Resources Board (ARB) with an emissions inventory of sources emitting greater than 10 tons per year of NOx or ROGs based on the use of emission factors acceptable to the ARB.

a. S-381-0-1: Facility-Wide Requirements
   
   • Condition 3 on the requirements for the proposed permit complies with this rule.

5. District Rule 2010 – Permits Required

District Rule 2010 sections 3.0 and 4.0 require any person building, modifying or replacing any operation that may cause the issuance of air contaminants to apply for an Authority to Construct (ATC) from the District in advance. The ATC will remain in effect until the Permit to Operate (PTO) is granted.

a. S-381-0-1: Facility-Wide Requirements

   • Condition 4 on the requirements for the proposed permit complies with this rule.

6. District Rule 2020 – Exemptions

District Rule 2020 lists equipment which is specifically exempt from obtaining permits and specifies recordkeeping requirements to verify such exemptions.

a. S-381-0-1: Facility-Wide Requirements

   • Condition 4 on the requirements for the proposed permit complies with this rule.
7. District Rule 2031 – Transfer of Permits

This rule requires a permit to operate or an authority to construct shall not be transferable, whether by operation of law or otherwise, from one location to another, from one piece of equipment to another, or from one person to another, unless a new application is filed with and approved by the APCO.

a. S-381-0-1: Facility-Wide Requirements
   
   • Condition 6 on the requirements for the proposed permit complies with this rule.

8. District Rule 2040 – Applications

The purpose of this rule is to explain the procedures for filing, denying, and appealing the denial of applications for an Authority to Construct or a Permit to Operate.

a. S-381-0-1: Facility-Wide Requirements
   
   • Condition 7 on the requirements for the proposed permit complies with this rule.

9. District Rule 2070 – Standards for Granting Applications

The purpose of this rule is to explain the standards by which an APCO may deny an application for an Authority to Construct or Permit to Operate. Any source operation must be constructed and operated in accordance with Rule 2201 (New and Modified Stationary Source Review Rule), Rule 4001 (New Source Performance Standards), and Rule 4002 (National Emissions Standards for Hazardous Air Pollutants), the Authority to Construct, and the Permit to Operate.

a. S-381-0-1: Facility-Wide Requirements
   
   • Condition 5 on the requirements for the proposed permit complies with this rule.

10. District Rule 2080 – Conditional Approval

The purpose of this rule is to grant authority to the APCO to issue or revise specific written conditions on an Authority to Construct or a Permit to Operate to assure compliance with air contaminant emission standards or limitations.
a. S-381-0-1: Facility-Wide Requirements
   • Condition 5 on the requirements for the proposed permit complies with this rule.

   • Condition 1 on the requirements for the proposed permit complies with this rule.

c. S-381-83-1, -84-1, -91-1, and -92-1 – Steel Wine and Spirit Storage and White Wine Fermentation Tanks
   • Condition 1 on the requirements for the proposed permit complies with this rule.

   • Condition 1 on the requirements for the proposed permit complies with this rule.

e. S-381-324-1, -325-1, -326-1, -330-1, -331-1, -332-1, -333-1, -334-1, -335-1, -338-1, -339-1, -340-1, -341-1, -342-1, -343-1, -344-1, and -345-1 – Steel Spirit Storage Tank
   • Condition 1 on the requirements for the proposed permit complies with this rule.

11. District Rule 2201 – New and Modified Stationary Source Review Rule

The permit unit is subject to the District Rule 2201 upon application for Authority to Construct (ATC). In accordance with the White Paper for Streamlined Development of Part 70 Permit Applications, dated July 10, 1995, conditions from the resulting Permit to Operate (PTO) were addressed to define how NSR permit terms should be incorporated into the Title V permit.
a. S-381-0-1: Facility-Wide Requirements

- Conditions 1 and 2 from the current facility-wide permit have been included as conditions 39 and 22 in the requirements for the proposed facility-wide permit.
- Condition 3 from the current facility-wide permit has been moved to the applicable proposed permits since the condition is not applicable to the storage and fermentation tanks.
- Conditions 4 through 8 from the current facility-wide permit have been included as conditions 40 through 44 in the requirements for the proposed facility-wide permit.

b. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

- Conditions 1 through 10 from the current PTO have been included as conditions 2 through 11 on the requirements for the proposed permit.
- Conditions 11 and 12 from the current PTO have not been included in the requirements for the proposed permit since the nearest K-12 school is 2.9 miles southeast of the facility.
- Condition 13 from the current PTO has been included as condition 12 on the proposed permit.

c. S-381-9-2: 26 MMBtu/hr Natural Gas-Fired Boiler with FGR, Zinc Rapid Mix FRMB 19-G-600 Low NOx Burner

- Conditions 1 through 15 from the current PTO have been included as conditions 2 through 16 on the requirements for the proposed permit.
- Condition 16 from the current PTO has been included as condition 18 on the proposed permit.

d. S-381-10-3: 33,310 Barrel Capacity Brandy Storage and Aging Operation (Buildings K & L) Served by a 0.289 MMBtu/hr Adwest Technologies Model Retox 1.0 RTO95 Primary Regenerative Thermal Oxidizer (Small RTO) and 1.156 MMBtu/hr Adwest Technologies Model Retox 4.0 RTO95 Secondary RTO (Large RTO)

- Conditions 1 and 2 from the current PTO have been moved to the proposed facility-wide permit as conditions 22 and 39.
- Conditions 3 and 4 from the current PTO have been included as conditions 1 and 2 on the proposed permit.
- Condition 5 on the current PTO is obsolete and is not included as a condition on the proposed permit. The facility’s option to
discontinue use of the VOC control system expired on July 1, 2010 and therefore, VOC control system requirements remain on the permit.

- Conditions 6 through 28 from the current PTO have been included as conditions 3 through 25 on the requirements for the proposed permit. The option to delete each requirement on or before July 1, 2010 had been removed from the conditions since it is no longer applicable.
- Conditions 29 and 30 from the current PTO have been included as conditions 26 and 27 on the requirements for the proposed permit. Both conditions had been revised to change the basis for determining the total evaporative emissions from calendar year to a 12-month rolling average in order to comply with Title V requirements. In addition, the option to delete each requirement on or before July 1, 2010 had been removed from the conditions since it is no longer applicable.
- Conditions 31 through 38 from the current PTO have been included as conditions 28 through 35 on the requirements for the proposed permit. The option to delete each requirement on or before July 1, 2010 had been removed from the conditions since it is no longer applicable.
- Conditions 39 through 42 from the current PTO have been included as conditions 36 through 39 on the requirements for the proposed permit.

e. S-381-11-1: 240 bhp Clarke Model JU6H-UF60 Tier 2 Certified Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

- Conditions 1 and 3 from the current PTO have been moved to the proposed facility-wide permit as conditions 39 and 22.
- Conditions 4 through 10 from the current PTO have been included as conditions 2 through 8 on the requirements for the proposed permit.
- Condition 11 from the current PTO has been included as condition 10 on the requirements for the proposed permit.

- Condition 1 from the current PTO has been moved to the proposed facility-wide permit as condition 39.
- Conditions 2 through 10 from the current PTO have been included as conditions 1 through 9 on the requirements for the proposed permit.

g. S-381-37-1, -38-1, -39-1, and -40-1 – Steel Wine and Spirit Storage and White Wine Fermentation Tanks

- Condition 1 from the current PTO has been moved to the proposed facility-wide permit as condition 39.

h. S-381-66-1, -67-1, and -68-1 – Plastic Wine and Spirit Storage and White Wine Fermentation Tanks

- Condition 1 from the current PTO has been moved to the proposed facility-wide permit as condition 39.
- Conditions 2 through 10 from the current PTO have been included as conditions 1 through 9 on the requirements for the proposed permit.

i. S-381-83-1, -84-1, -91-1, and -92-1 – Steel Wine and Spirit Storage and White Wine Fermentation Tanks

- Condition 1 from the current PTO has been moved to the proposed facility-wide permit as condition 39.
- Conditions 2 through 10 from the current PTO have been deleted and not included in the requirements for the proposed permit. The capacities of both tanks are less than 5,000 gallons and exempt from District Rule 4694.

- Condition 1 from the current PTO has been moved to the proposed facility-wide permit as condition 39.

- Condition 1 from the current PTO has been moved to the proposed facility-wide permit as condition 39.
- Conditions 2 through 10 from the current PTO have been included as conditions 1 through 9 on the requirements for the proposed permit.

l. S-381-324-1, -325-1, -326-1, -330-1, -331-1, -332-1, -333-1, -334-1, -335-1, -338-1, -339-1, -340-1, -341-1, -342-1, -343-1, -344-1, and -345-1 – Steel Spirit Storage Tank

- Condition 1 from the current PTO has been moved to the proposed facility-wide permit as condition 39.

12. District Rule 2520 – Federally Mandated Operating Permits

The purpose of this rule is to provide for the following: An administrative mechanism for issuing operating permits for new and modified sources of air contaminants in accordance with requirements of 40 CFR Part 70. An administrative mechanism for issuing renewed operating permits for sources of air contaminants in accordance with requirements of 40 CFR Part 70. An administrative mechanism for revising, reopening, revoking, and terminating operating permits for sources of air contaminants in accordance with requirements of 40 CFR Part 70. An administrative mechanism for incorporating requirements authorized by preconstruction permits issued under District Rule 2201 (New and Modified Stationary Source Review) in a Part 70 permit as administrative amendments, provided that such permits meet procedural requirements substantially equivalent to the requirements of 40 CFR 70.7 and 70.8, and compliance requirements substantially equivalent to those contained in 40 CFR 70.6. The applicable federal and local requirements to appear on a single permit.
Section 5.2 requires permittees submit applications for Title V permit renewal at least six months prior to permit expiration.

a. S-381-0-1: Facility-Wide Requirements

   - Condition 37 on the requirements for the proposed permit complies with this rule.

Section 9.0 of District Rule 2520 requires certain elements to be contained in each Title V permit:

Section 9.1.1 of District Rule 2520 requires all conditions on Title V permits specify a reference of the origin of an authority for each term or condition, and identify any difference in form as compared to the applicable requirements upon which the term or condition is based.

Section 9.3.2 states where applicable requirements do not require periodic testing or instrumental or non-instrumental monitoring, periodic monitoring to yield reliable data for the relevant time period that are representative of the source's compliance with the permit, as reported pursuant to the requirements of section 9.5 of this rule. Such monitoring requirements shall assure use of terms, test methods, units, averaging periods, and other statistical conventions consistent with applicable requirement. Recordkeeping requirements may be sufficient to meet the requirements of this section.

a. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

   - Condition 11 on the requirements for the proposed permit complies with this rule.

Section 9.4 contains requirements to incorporate all applicable recordkeeping requirements into the Title V permit. This section also specifies records of any required monitoring and support data be kept for a period of five years.

a. S-381-01: Facility-Wide Requirements

   - Conditions 8 and 9 on the requirements for the proposed permit comply with this rule.

Section 9.5 requires the submittal of monitoring reports at least every six months. Prompt reporting of deviations from permitting requirements,
including those attributable to upset conditions is also required. The responsible official must certify all required reports.

a. S-381-0-1: Facility-Wide Requirements

   - Conditions 10 and 11 on the requirements for the proposed permit comply with this rule.

Section 9.7 states that the Title V permit must also contain a severability clause in case of a court challenge.

a. S-381-0-1: Facility-Wide Requirements

   - Condition 12 on the requirements for the proposed permit complies with this rule.

Section 9.8 contains requirements for provisions in the Title V permit stating 1) the permittee must comply with all permit conditions; 2) the permitted activity should not be reduced in order to comply with the permit conditions. Further, this reasoning shall not be used as a defense in an enforcement action, 3) the permit may be revoked, modified, reissued, or reopened for cause, 4) the Title V permit does not reflect any property rights, and 5) the permittee will furnish the District with any requested information to determine compliance with the conditions of the Title V permit.

a. S-381-0-1: Facility-Wide Requirements

   - Conditions 5 and 13 through 16 on the requirements for the proposed permit comply with this rule.

Section 9.9 requires the permit specify that the permittee pay annual permit fees and applicable fees from District Rules 3010, 3030, 3050, 3080, 3090, 3110, and 3120.

a. S-381-0-1: Facility-Wide Requirements

   - Condition 17 on the requirements for the proposed permit complies with this rule.

Section 9.13.1 requires any report or document submitted under a permit requirement or a request for information by the District or EPA contain a certification by a responsible official as to truth, accuracy, and completeness.
a. S-381-0-1: Facility-Wide Requirements

- Condition 26 on the requirements for the proposed permit complies with this rule.

Section 9.13.2 contains inspection and entry requirements that allows an authorized representative of the District to enter a permittee’s premises to inspect equipment, operations, work practices, permits on file, and to sample substances or monitor parameters for the purpose of assuring compliance with the permit requirements.

a. S-381-0-1: Facility-Wide Requirements

- Conditions 18, 19, 20, and 21 on the requirements for the proposed permit comply with this rule.

Section 9.16 requires that the permittee submit certification of compliance with the terms and standards of Title V permits to the EPA and the District annually (or more frequently as required by the applicable requirement or the District).

a. S-381-0-1: Facility-Wide Requirements

- Condition 36 on the requirements for the proposed permit complies with this rule.

Section 10.0 requires any application form, report, or compliance certification submitted pursuant to these regulations shall contain certification of truth, accuracy, and completeness by a responsible official.

a. S-381-0-1: Facility-Wide Requirements

- Condition 26 on the requirements for the proposed permit complies with this rule.

Greenhouse Gas Requirements

There are no federally applicable Greenhouse Gas (GHG) requirements for this source. It should be noted that the Mandatory Greenhouse Gas Reporting rule (40CFR Part 98) is not included in the definition of an applicable requirement within Title V (per 40CFR 71.2). Therefore, there will be no further discussion of GHG in this evaluation.
13. **District Rule 4101 – Visible Emissions**

The purpose of this rule is to prohibit the emissions of visible air contaminants to the atmosphere. Section 5.0 prohibits the discharge of any air contaminant for a period or periods aggregating more than 3 minutes in any one hour which is as dark or darker in shade as that designated as No. 1 on the Ringelmann Chart; or is of such opacity as to obscure an observer’s view to a degree equal to or greater than the smoke described in Section 5.1 of Rule 4101.

a. S-381-0-1: Facility-Wide Requirements

   - Condition 22 on the requirements for the proposed permit complies with this rule.

14. **District Rule 4201 – Particulate Matter Concentration**

The purpose of this rule is to protect the ambient air quality by establishing a particulate matter emission standard. Section 3.1 requires emissions to be at or below 0.1 grains of particulate matter per dry standard cubic foot of exhaust gas.

**Diesel-Fired IC Engines**

The diesel-fired internal combustion engines are US EPA certified to Tier 1 and 2 standards with PM emissions less than 0.4 g/bhp-hr. The following calculation will show that the particulate matter emissions from both diesel-fired engines will be less than or equal to the rule limit of 0.1 grain per cubic foot of gas at dry standard conditions:

$$\text{PM Conc.} = \frac{0.4 \text{ g-PM}_{10}/\text{bhp-hr} \times 1 \text{ g-PM} / 0.96 \text{ g-PM}_{10} \times 1 \text{ bhp-hr} / 2,542.5 \text{ Btu} \times 1,000,000 \text{ Btu}/9,051 \text{ dscf} \times 0.35 \text{ Btu}_{\text{std}}/1 \text{ Btu}_{\text{in}} \times 15.43 \text{ gr/g}}{\text{PM Conc.} = 0.098 \text{ gr-PM/dscf} < 0.1 \text{ gr-PM/dscf}}$$

a. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

   - Condition 1 on the proposed permit complies with this rule.

b. S-381-11-1: 240 bhp Clarke Model JU6H-UF60 Tier 2 Certified Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

   - Condition 1 on the proposed permit complies with this rule.
Natural Gas-Fired Boiler and Regenerative Thermal Oxidizers (RTO)

The following calculation shows that the boiler and RTOs in this facility firing on natural gas emit less than 0.1 grains of particulate matter per dry standard cubic foot of exhaust gas.

Natural Gas-Fired:

\[
\frac{7.6 \text{ lb PM}}{10^6 \text{ ft}^3} \left( \frac{1 \text{ MMBtu}}{8710 \text{ dscf}} \right) \left( \frac{1 \text{ scf}}{950 \text{ Btu}} \right) \left( \frac{7000 \text{ gr}}{1 \text{ lb}} \right) = 0.006 \frac{\text{grains}}{\text{dscf}}
\]

Where:

\[
7.6 \frac{\text{lb} \cdot \text{PM}}{10^6 \cdot \text{ft}^3} = \text{uncontrolled emission factor for natural gas fired boilers (AP42, Table I.4 - 12)}
\]

\[
\frac{950 \text{ Btu}}{\text{scf}} = \text{the minimum expected higher heating value of natural gas (AP42, 1.4.1)}
\]

\[
\frac{8710 \text{ dscf}}{\text{MMBtu}} = F \text{ factor, Fd, for natural gas (40 CFR §60, App. A, Meth. 19, Table 19 - 1)}
\]

\[
\frac{7000 \text{ gr}}{1 \text{ lb}} = \text{conversion factor (AP42, Appendix A)}
\]

a. S-381-9-2: 26 MMBtu/hr Natural Gas-Fired Boiler with FGR, Zinc Rapid Mix FRMB 19-G-600 Low NOx Burner

- Condition 1 on the proposed permit complies with this rule.

b. S-381-10-3: 33,310 Barrel Capacity Brandy Storage and Aging Operation (Buildings K & L) Served by a 0.289 MMBtu/hr Adwest Technologies Model Retox 1.0 RTO95 Primary Regenerative Thermal Oxidizer (Small RTO) and 1.156 MMBtu/hr Adwest Technologies Model Retox 4.0 RTO95 Secondary RTO (Large RTO)

- Condition 1 on the proposed permit complies with this rule.

15. District Rule 4305 – Boilers, Steam Generators and Process Heaters – Phase 2

The purpose of this rule is to limit emissions of oxides of nitrogen (NO\textsubscript{X}) and carbon monoxide (CO) from boilers, steam generators, and process heaters. This rule applies to any gaseous fuel or liquid fuel fired boiler,
steam generator, or process heater with a rated heat input greater than 5 million Btu per hour.

Since emissions limits of District Rule 4306 and all other requirements are equivalent or more stringent than District Rule 4305 requirements, compliance with District Rule 4306 requirements as shown in the following section will satisfy requirements of District Rule 4305.

The purpose of this rule is to limit emissions of oxides of nitrogen (NOx) and carbon monoxide (CO) from boilers, steam generators, and process heaters. This rule applies to any gaseous fuel or liquid fuel fired boiler, steam generator, or process heater with a rated heat input greater than 5 million Btu per hour.

§5.0 Requirements

§5.1 NOx and CO Emission Limits

§5.1.1 Except for units subject to Sections 5.2, NOx and carbon monoxide (CO) emissions shall not exceed the limits specified in Table 1.

<table>

§5.4 Monitoring Provisions

§5.4.2 The operator of any unit subject to the applicable emission limits in Sections 5.1 shall install and maintain an operational APCO approved Continuous Emissions Monitoring System (CEMS) for NOx, CO, and oxygen, or implement an APCO-approved Alternate Monitoring System. An APCO approved CEMS shall comply with the requirements of 40 Code of Federal Regulations (CFR) Part 51, 40 CFR Parts 60.7 and 60.13 (except subsection h), 40 CFR Part 60 Appendix B (Performance Specifications) and 40 CFR Part 60 Appendix F (Quality Assurance Procedures, and applicable provisions of Rule 1080 (Stack Monitoring).
An APCO approved Alternate Monitoring System shall monitor one or more of the following:

- §5.4.2.1 periodic NOx and CO exhaust emission concentrations,
- §5.4.2.2 periodic exhaust oxygen concentration,
- §5.4.2.3 flow rate of reducing agent added to exhaust,
- §5.4.2.4 catalyst inlet and exhaust temperature,
- §5.4.2.5 catalyst inlet and exhaust oxygen concentration,
- §5.4.2.6 periodic flue gas recirculation rate,
- §5.4.2.7 other operational characteristics.

§5.4.3 For units subject to the requirements of Section 5.2.1 or 5.2.2, the operator shall monitor, at least on a monthly basis, the operational characteristics recommended by the manufacturer and approved by the APCO.

§5.5 Compliance Determination

§5.5.1 The operator of any unit shall have the option of complying with either the applicable heat input (lb/MMBtu) emission limits or the concentration (ppmv) emission limits specified in Section 5.1. The emission limits selected to demonstrate compliance shall be specified in the source test proposal pursuant to Rule 1081 (Source Sampling).

§5.5.2 All emissions measurements shall be made with the unit operating either at conditions representative of normal operations or conditions specified in the Permit to Operate. Unless otherwise specified in the Permit to Operate no determination of compliance shall be established within two hours after a continuous period in which fuel flow to the unit is shut off for 30 minutes or longer, or within 30 minutes after a re-ignition as defined in Section 3.0.

§5.5.4 For emissions monitoring pursuant to Sections 5.4.2, 5.4.2.1, and 6.3.1 using a portable NOx analyzer as part of an APCO approved Alternate Emissions Monitoring System, emission readings shall be averaged over a 15 consecutive-minute period by either taking a cumulative 15-consecutive-minute sample reading or by taking at least five (5) readings evenly spaced out over the 15-consecutive-minute period.

§5.5.5 For emissions source testing performed pursuant to Section 6.3.1 for the purpose of determining compliance with an applicable standard or numerical limitation of this rule, the arithmetic average of three (3) 30-consecutive-minute test runs shall apply. If two (2) of three (3) runs are above an applicable limit the test cannot be used to demonstrate compliance with an applicable limit.
§6.2 Test Methods
The following test methods shall be used unless otherwise approved by the APCO and EPA.

§6.2.1 Fuel hhv shall be certified by third party fuel supplier or determined by:
§6.2.1.2 ASTM D 1826-88 or D 1945-81 in conjunction with ASTM D 3588-89 for gaseous fuels.

§6.2.2 Oxides of nitrogen (ppmv) - EPA Method 7E, or ARB Method 100.
§6.2.3 Carbon monoxide (ppmv) - EPA Method 10, or ARB Method 100.
§6.2.4 Stack gas oxygen - EPA Method 3 or 3A, or ARB Method 100.
§6.2.5 NOx Emission Rate (Heat Input Basis) - EPA Method 19.
§6.2.6 Stack gas velocities - EPA Method 2.
§6.2.7 Stack gas moisture content - EPA Method 4.

§6.3 Compliance Testing
§6.3.1 Each unit subject to the requirements in Sections 5.1 or 5.2.3 shall be source tested to determine compliance with the applicable emission limits at least once every 12 months, (no more than 30 days before or after the required annual source test date). Units that demonstrate compliance on two consecutive 12-month source tests may defer the following 12-month source test for up to 36 months (no more than 30 days before or after the required 36-month source test date).

a. S-381-9-2: 26 MMBtu/hr Natural Gas-Fired Boiler with FGR, Zinc Rapid Mix FRMB 19-G-600 Low NOx Burner

- Conditions 4 through 12, 15, 16, and 18 on the proposed permit comply with this rule.

17. District Rule 4320 – Advanced Emission Reduction Options for Boilers, Steam Generators, and Process Heaters Greater than 5.0 MMBtu/hr

The purpose of this rule is to limit the emissions of oxides of nitrogen (NOx), carbon monoxide (CO), oxides of sulfur (SO2), and particulate matter 10 microns or less (PM10) from boilers, steam generators, and process heaters. This rule applies to any gaseous fuel or liquid fuel fired boiler, steam generator, or process heater with a total rated heat input greater than 5 million Btu per hour.

§5.1 states that operators of a unit(s) shall comply with all applicable requirements of the rule and one of the following, on a unit-by-unit basis:
§5.1.1 requires the unit comply with the emission limits specified in §5.2 and 5.4; or

§5.1.2. Pay an annual emissions fee to the District as specified in §5.3 and comply with the control requirements specified in §5.4.

§5.1.3. Comply with the applicable Low-use Unit requirements of §5.5.

§5.2 NOx and CO Emission Limits

§5.2.1. On and after the indicated Compliance Deadline, units shall not be operated in a manner which exceeds the applicable NOx emissions limit specified in Table 1. On and after October 1, 2008, units shall not be operated in a manner to which exceeds a carbon monoxide (CO) emissions limit of 400 ppmv.

§5.4 states the particulate matter control requirements.

§5.4.1 To limit particulate matter emissions, an operator shall comply with one of the following requirements:

§5.4.1.1 On and after the applicable NOx Compliance Deadline specified in §5.2 Table 1, operators shall fire units exclusively on PUC-quality natural gas, commercial propane, butane, or liquefied petroleum gas, or a combination of such gases;

§5.4.1.2 On and after the applicable NOx Compliance Deadline specified in §5.2 Table 1, operators shall limit fuel sulfur content to no more than five (5) grains of total sulfur per one hundred (100) standard cubic feet; or

§5.4.1.3 On and after the applicable NOx Compliance Deadline specified in §5.2 Table 1, operators shall install and properly operate an emission control system that reduces SO2 emissions by at least 95% by weight; or limit exhaust SO2 to less than or equal to 9 ppmv corrected to 3.0% O2.
a. S-381-9-2: 26 MMBtu/hr Natural Gas-Fired Boiler with FGR, Zinc Rapid Mix FRMB 19-G-600 Low NOx Burner

The facility chose to comply with Table 1, Category B of §5.2.1 of this rule which is to comply with the standard schedule emission limits of 7 ppmv or 0.008 lb/MMBtu and comply with the control requirements specified in §5.4.1.1 by firing exclusively on PUC-regulated natural gas.

- Conditions 3, 4 through 12, 15, 16, and 18 on the proposed permit comply with this rule.

18. District Rule 4601 – Architectural Coatings

This rule limits the emissions of VOCs from architectural coatings. It requires limiting the application of any architectural coating to no more than what is listed in the Table of Standards (Section 5.0). This rule further specifies labeling requirements, coatings thinning recommendations and storage requirements.

a. S-381-0-1: Facility-Wide Requirements

- Conditions 23, 24, and 25 on the requirements for the proposed permit comply with this rule.

19. District Rule 4694, Wine Fermentation and Storage Tanks (Storage Tank Provisions Only)

The purpose of this rule is to reduce emissions of volatile organic compounds (VOC) from the fermentation and bulk storage of wine, or achieve equivalent reductions from alternative emission sources. The rule is applicable to any facility with VOC emissions in excess of 10 tons per year. For those facilities to which the rule applies, the requirements of the rule are applicable to any fermentation or storage tank with capacity in excess of 5,000 gallons.

As previously discussed in Section VIII, on August 18, 2011 the District approved an amended SIP submittal which excludes the fermentation provisions of District Rule 4694 while maintaining the storage provisions. Therefore, only the storage provisions are federally enforceable and will be discussed below.

§5.2 places specific restrictions on wine storage tanks with 5,000 gallons or more in capacity when such tanks are not constructed of wood or concrete.
§5.2.1 requires these tanks to be equipped and operated with a pressure-vacuum relief valve meeting all of the following requirements:

- The pressure-vacuum relief valve shall operate within 10% of the maximum allowable working pressure of the tank,
- The pressure-vacuum relief valve shall operate in accordance with the manufacturer's instructions, and
- The pressure-vacuum relief valve shall be permanently labeled with the operating pressure settings.
- The pressure-vacuum relief valve and storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21.

§5.2.2 requires that the temperature of the stored wine be maintained at or below 75 °F.

§6.4 requires that weekly records be kept of wine volume and temperature in each storage tank and that all records be retained for five years.

- Conditions 1 through 7, and 9 on the proposed permits ensure compliance with the rule.

- Conditions 1 through 7, and 9 on the proposed permits ensure compliance with the rule.

- Conditions 1 through 7, and 9 on the proposed permits ensure compliance with the rule.

20. **District Rule 4701 – Internal Combustion Engines–Phase 1**

The purpose of this rule is to limit the emissions of nitrogen oxides (NOₓ), carbon monoxide (CO), and volatile organic compounds (VOC) from internal combustion engines. Except as provided in Section 4.0, the provisions of this rule apply to any internal combustion engine, rated greater than 50 bhp that requires a Permit to Operate (PTO).

There are 10 natural gas-fired IC engine involved with this project. Pursuant to Section 2.0 of District Rule 4701, these engines are subject to District Rule 4701–Internal Combustion Engines–Phase 1. In addition, these engine are also subject to District Rule 4702–Internal Combustion Engines–Phase 2.

Since the emissions limits of District Rule 4702 and all other requirements are equivalent or more stringent than District Rule 4701 requirements, compliance with 4702 rule requirements will satisfy requirements of District Rule 4701 and no further discussion is required.

21. **District Rule 4702 – Internal Combustion Engines–Phase 2**

The purpose of this rule is to limit the emissions of nitrogen oxides (NOₓ), carbon monoxide (CO), and volatile organic compounds (VOC) from internal combustion engines. This rule applies to any internal combustion (IC) engine with a rated brake horsepower greater than 50 horsepower.

§4.2 Except for the requirements of Sections 5.9 and 6.2.3, the requirements of this rule shall not apply to an emergency standby engine or a low-use engine, provided that the engine is operated with an operating nonresettable elapsed time meter.
§4.2.1 In lieu of operating a nonresettable elapsed time meter, the operator may use an alternative device, method, or technique, in determining operating time, provided that the alternative is approved by the APCO and EPA and is allowed by the Permit-to-Operate or Permit-Exempt Equipment Registration. The operator must demonstrate that the alternative device, method, or technique is equivalent to using a nonresettable elapsed time meter.

§4.2.2 The operator shall properly maintain and operate the nonresettable elapsed time meter or alternative device in accordance with the manufacturer’s instructions.

§5.9 Monitoring Requirements: All Other Engines

§5.9.1 The operator of any of the following engines shall comply with the requirements specified in Section 5.9.2 through Section 5.9.5 below:

§5.9.2 Properly operate and maintain each engine as recommended by the engine manufacturer or emission control system supplier.

§5.9.3 Monitor the operational characteristics of each engine as recommended by the engine manufacturer or emission control system supplier.

§5.9.4 Install and operate a nonresettable elapsed time meter.

§5.9.4.1 In lieu of installing a nonresettable elapsed time meter, the operator may use an alternative device, method, or technique, in determining operating time provided that the alternative is approved by the APCO and EPA and is allowed by a Permit-to-Operate or Permit-Exempt Equipment Registration condition.

§5.9.4.2 The operator shall properly maintain and operate the nonresettable elapsed time meter or alternative device in accordance with the manufacturer’s instructions.

§6.2.3 An operator claiming an exemption under Section 4.2 or Section 4.3 shall maintain annual operating records. This information shall be retained for at least five years, shall be readily available, and provided to the APCO upon request. The records shall include, but are not limited to, the following:

§6.2.3.1 Total hours of operation,
§6.2.3.2 The type of fuel used,
§6.2.3.3 The purpose for operating the engine,
§6.2.3.4 For emergency standby engines, all hours of non-emergency and emergency operation shall be reported, and
§6.2.3.5 Other support documentation necessary to demonstrate claim to the exemption.

a. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump
   • Conditions 3, 4, 6 through 10, and 12 on the proposed permit comply with this rule.

b. S-381-11-1: 240 bhp Clarke Model JU6H-UF60 Tier 2 Certified Diesel-Fired Emergency IC Engine Powering a Fire Water Pump
   • Conditions 3, 4, 8, 9, and 10 on the proposed permit comply with this rule.

22. District Rule 8011, 8021, 8031, 8041, 8051, 8061, and 8071 – SJVUAPCD Regulation VIII - Fugitive Dust (PM10)

These regulations contain requirements for the control of fugitive dust. These requirements apply to various sources, including construction, demolition, excavation, extraction, mining activities, outdoor storage piles, paved and unpaved roads.

a. S-381-0-1: Facility-Wide Requirements
   • Conditions 29 through 34 on the requirements for the proposed permit comply with these rules.

23. 40 CFR Part 60, Subpart Dc – Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units

This subpart applies to each steam generating unit for which construction, modification, or reconstruction commenced after June 9, 1989 and that has a maximum design heat input capacity of 100 MMBtu/hr or less, but greater than 10 MMBtu/hr.

a. S-381-9-2: 26 MMBtu/hr Natural Gas-Fired Boiler with FGR, Zinc Rapid Mix FRMB 19-G-600 Low NOx Burner
   • Condition 17 on the requirements for the proposed permit complies with this rule.

This provisions of this subpart are applicable to owners, and operators of stationary compression ignition (CI) internal combustion engines (ICE) that commence construction after July 11, 2005 where the stationary CI ICE are manufactured as a certified National Fire Protection Association fire pump engine July 1, 2006.

a. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

- This engine was installed prior to July 11, 2005 and manufactured prior to July 1, 2006. Therefore this engine is not subject to this subpart.

b. S-381-11-1: 240 bhp Clarke Model JU6H-UF60 Tier 2 Certified Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

§60.4205(c) Owners and operators of fire pump engines with a displacement of less than 30 liters per cylinder must comply with the emissions standards in Table 4 Subpart III of Part 60.

<table>
<thead>

§60.4207(b) Beginning October 1, 2010, owners and operators of stationary CI ICE subject to this subpart with a displacement of less than 30 liters per cylinder that use diesel fuel must purchase diesel fuel that meets the requirements of 40 CFR 80.510(b) for nonroad diesel fuel.

§60.4211(a) If you are an owner or operator and must comply with the emission standards specified in this subpart, you must do all of the following, except as permitted under paragraph (g) of this section: (1) Operate and maintain the stationary CI internal combustion engine and control device according to the manufacturer's emission-related written instructions; (2) Change only those emission-related settings that are permitted by the manufacturer; and (3) Meet the requirements of 40 CFR parts 89, 94 and/or 1068, as they apply to you.
• Conditions 2, 5, 6, and 9 on the requirements for the proposed permit comply with this rule.

There are applicable requirements from the National Emissions Standards for Hazardous Air Pollutants that apply to all sources in general. These requirements pertain to asbestos removal and disposal from renovated or demolished structures.

a. S-381-0-1: Facility-Wide Requirements

• Condition 35 on the requirements for the proposed permit complies with this rule.

Subpart ZZZZ establishes national emission limitations and operating limitations for hazardous air pollutants (HAP) emitted from stationary reciprocating internal combustion engines (RICE) located at major and area sources of HAP emissions. This subpart also establishes requirements to demonstrate initial and continuous compliance with the emission limitations and operating limitations.

§63.6585 states an owner or operator is subject to this subpart if it owns or operates a stationary RICE at a major or area source of HAP emissions.

§63.6585(b) A major source of HAP emissions is a plant site that emits or has the potential to emit any single HAP at a rate of 10 tons or more per year or any combination of HAP at a rate of 25 tons or more per year.

§63.6585(c) An area source of HAP emissions is a source that is not a major source.

• This facility is an area source of HAP emissions since it is not a major source of HAP per §63.6585(b).

§63.6590(a)(1)(iii) For stationary RICE located at an area source of HAP emissions, a stationary RICE is existing if you commenced construction or reconstruction of the stationary RICE before June 12, 2006.
• Permit unit S-381-6-1 is an existing stationary RICE since it commenced construction before June 12, 2006.

§63.6595(a)(1) An existing stationary CI RICE located at an area source of HAP emissions must comply with the applicable emission limitations and operating limitations no later than May 3, 2013.

• On permit unit S-381-6-1, the compliance date of May 3, 2013 is included in the conditions that comply with this subpart.

§63.6603(a) An existing stationary RICE located at an area source of HAP emissions must comply with the applicable requirements in Table 2d to this subpart and the operating limitations in Table 1b and Table 2b to this subpart that apply to you.

Table 1b to Subpart ZZZZ of Part 63—Operating Limitations for Existing, New, and Reconstructed Spark Ignition 4SRB Stationary RICE >500 HP Located at a Major Source of HAP Emissions and Existing Spark Ignition 4SRB Stationary RICE >500 HP Located at an Area Source of HAP Emissions

• Permit unit S-381-6-1 does not meet the criteria in Table 1b heading and therefore, is not subject to the operating limitations in Table 1b.

Table 2b to Subpart ZZZZ of Part 63—Operating Limitations for New and Reconstructed 2SLB and Compression Ignition Stationary RICE >500 HP Located at a Major Source of HAP Emissions, New and Reconstructed 4SLB Stationary RICE ≥250 HP Located at a Major Source of HAP Emissions, Existing Compression Ignition Stationary RICE >500 HP, and Existing 4SLB Stationary RICE >500 HP Located at an Area Source of HAP Emissions

• Permit unit S-381-6-1 does not meet the criteria in Table 2b heading and therefore, is not subject to the operating limitations in Table 2b.

Table 2d to Subpart ZZZZ of Part 63—Requirements for Existing Stationary RICE Located at Area Sources of HAP Emissions
As stated in §§63.6603 and 63.6640, you must comply with the following requirements for existing stationary RICE located at area sources of HAP emissions:

<table>
<thead>
<tr>
<th>For each</th>
<th>You must meet the following requirement, except during periods of startup</th>
<th>During periods of startup you must</th>
</tr>
</thead>
</table>

31
4. Emergency stationary CI RICE

a. Change oil and filter every 500 hours of operation or annually, whichever comes first;¹
b. Inspect air cleaner every 1,000 hours of operation or annually, whichever comes first; and
c. Inspect all hoses and belts every 500 hours of operation or annually, whichever comes first, and replace as necessary.

Minimize the engine's time spent at idle and minimize the engine's startup time at startup to a period needed for appropriate and safe loading of the engine, not to exceed 30 minutes, after which time the non-startup emission limitations apply.

§63.6625(f) If you own or operate an existing emergency stationary RICE with a site rating of less than or equal to 500 brake HP located at a major source of HAP emissions or an existing emergency stationary RICE located at an area source of HAP emissions, you must install a non-resettable hour meter if one is not already installed.

§63.6640(a) You must demonstrate continuous compliance with each emission limitation and operating limitation in Tables 1a and 1b, Tables 2a and 2b, Table 2c, and Table 2d to this subpart that apply to you according to methods specified in Table 6 to this subpart.

Table 6 to Subpart ZZZZ of Part 63—Continuous Compliance With Emission Limitations, Operating Limitations, Work Practices, and Management Practices

As stated in §63.6640, you must continuously comply with the emissions and operating limitations and work or management practices as required by the following:

<table>
<thead>
<tr>
<th>For each</th>
<th>Complying with the requirement to</th>
<th>You must demonstrate continuous compliance by</th>
</tr>
</thead>
<tbody>
<tr>
<td>9. Existing emergency and black start stationary RICE located at an area source of HAP</td>
<td>a. Work or Management practices</td>
<td>i. Operating and maintaining the stationary RICE according to the manufacturer's emission-related operation and maintenance instructions; or ii. Develop and follow your own maintenance plan which must provide to the extent practicable for the</td>
</tr>
</tbody>
</table>
§63.6640(f)(ii) You may operate your emergency stationary RICE for the purpose of maintenance checks and readiness testing, provided that the tests are recommended by Federal, State or local government, the manufacturer, the vendor, or the insurance company associated with the engine. Maintenance checks and readiness testing of such units is limited to 100 hours per year.

§63.6655(e) You must keep records of the maintenance conducted on the stationary RICE in order to demonstrate that you operated and maintained the stationary RICE.

§63.6655(f) If you own or operate any of the stationary RICE in paragraphs (f)(1) or (2) of this section, you must keep records of the hours of operation of the engine that is recorded through the non-resettable hour meter. The owner or operator must document how many hours are spent for emergency operation, including what classified the operation as emergency and how many hours are spent for non-emergency operation.

a. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump
   - Conditions 3, 10, and 12 through 19 on the proposed permit comply with this rule.

b. S-381-11-1: 240 bhp Clarke Model JU6H-UF60 Tier 2 Certified Diesel-Fired Emergency IC Engine Powering a Fire Water Pump
   - This engine was installed after 6/12/06, complies with 40 CFR 60 Subpart III and, therefore complies with this rule.

27. 40 CFR Part 64 – Compliance Assurance Monitoring

40 CFR Part 64 requires Compliance Assurance Monitoring (CAM) for units that meet the following three criteria:

1) the unit must have an emission limit for the pollutant;
2) the unit must have add-on controls for the pollutant; these are devices such as flue gas recirculation (FGR), baghouses, and catalytic oxidizers; and
3) the unit must have a pre-control potential to emit of greater than the major source thresholds.

a. S-381-6-1: 235 bhp Detroit Model DDFP-04ATRH Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

This permit unit has emissions limit for PM$_{10}$ but it does not have add-on controls for this criteria pollutant. Therefore, this permit unit is not subject to CAM for PM$_{10}$.

b. S-381-9-2: 26 MMBtu/hr Natural Gas-Fired Boiler with FGR, Zinc Rapid Mix FRMB 19-G-600 Low NOx Burner

This permit unit has emissions limits for SO$_x$, PM$_{10}$, CO, and VOC but it does not have add-on controls for these criteria pollutants. Therefore, this permit unit is not subject to CAM for SO$_x$, PM$_{10}$, CO, and VOC.

This permit may be subject to CAM for NO$_x$ since there is a NO$_x$ limit, and it has add-on controls in the form of FGR. However, the following calculation shows the pre-control NO$_x$ potential to emit is less than the major source threshold of 20,000 pounds NO$_x$/year as shown below. Therefore, this unit is not subject to CAM.

The natural gas controlled-low NOx emission factor is 50 lb/MMscf or 0.049 lb/MMBtu (AP-42, 1.4.5, July 1998). The maximum rating for this unit is 26 MMBtu/hr.

\[
26 \text{ MMBtu/hr} \times 0.049 \text{ lb NO}_x/\text{MMBtu} \times 8760 \text{ hrs/year} = 11,160 \text{ lbs-NO}_x/\text{year}
\]

c. S-381-10-3: 33,310 Barrel Capacity Brandy Storage and Aging Operation (Buildings K & L) Served by a 0.289 MMBtu/hr Adwest Technologies Model Retox 1.0 RTO95 Primary Regenerative Thermal Oxidizer (Small RTO) and 1.156 MMBtu/hr Adwest Technologies Model Retox 4.0 RTO95 Secondary RTO (Large RTO)

This permit unit has emissions limits for NO$_x$, SO$_x$, PM$_{10}$, and CO but it does not have add-on controls for these criteria pollutants. Therefore, this permit unit is not subject to CAM for NO$_x$, SO$_x$, PM$_{10}$, and CO.

The permit has a combined controlled VOC emissions limit of 46,108 lb-VOC/yr for both storage building K & L. In order to achieve this VOC emissions limit, the evaporative emission from both brandy storage
buildings are collected and ducted to two regenerative thermal oxidizers (RTO) with each having a VOC destruction efficiency of not less than 98%.

The following calculation shows that the pre-control VOC potential to emit from the emissions unit is greater than the major threshold for VOC of 20,000 lb/year.

\[
\text{VOC}_{\text{pre-control}} = \frac{46,108 \text{ lb-VOC/yr}}{(1-0.98)} = 2,305,400 \text{ lb-VOC/yr} > 20,000 \text{ lb/yr (Major Source)}
\]

Therefore, the emissions unit is subject to CAM for VOC.

In addition, per §64.3(b)(4)(ii) states that for all pollutant-specific emissions units with the potential to emit, calculated including the effect of control devices, the applicable regulated air pollutant in an amount equal to or greater than 100 percent of the amount, in tons per year, required for a source to be classified as a major source, for each parameter monitored, the owner or operator shall collect four or more data values equally spaced over each hour and average the values, as applicable, over the applicable averaging period.

With a post-control potential to emit of 46,108 lb-VOC/yr that is greater than the major source threshold of 20,000 lb-VOC/yr, the facility complies with the increase monitoring frequency requirement of rule with the use of a continuous monitoring system that monitors the combustion chamber temperature of each RTO to ensure that the 98% VOC destruction efficiency is maintained.

- Conditions 23, 39, 40, 41, 42, and 43 on the proposed permit comply with this rule.

d. S-381-11-1: 240 bhp Clarke Model JU6H-UF60 Tier 2 Certified Diesel-Fired Emergency IC Engine Powering a Fire Water Pump

This permit unit has emissions limits for NO\(_X\), PM\(_{10}\), CO, and VOC but it does not have add-on controls for these criteria pollutants. Therefore, this permit unit is not subject to CAM for NO\(_X\), PM\(_{10}\), CO, and VOC.

§64.1 states that an emission limitation or standard may also be expressed either as a work practice, process or control device parameter, or other form of specific design, equipment, operational, or operation and maintenance requirement. A control device is also defined as equipment that is used to destroy or remove air pollutants prior to discharge to the atmosphere.

The emission units have a condition that the temperature of the wine stored shall not exceed 75 °F which is based on the storage provisions of District Rule 4694. This requirement meets CAM’s definition of an emission limitation or standard.

The tanks are equipped with a pressure-vacuum relief valve as the add-on control device that does not meet the CAM’s definition of a control device. Therefore, the emission units are not subject to CAM.

These permit units have no emissions limits for any criteria pollutants. Therefore, the permit units are not subject to CAM.

g. S-381-66-1, -67-1, and -68-1 – Plastic Wine and Spirit Storage and White Wine Fermentation Tanks

The emission units have a condition that the temperature of the wine stored shall not exceed 75 °F which is based on the storage provisions of District Rule 4694. This requirement meets CAM’s definition of an emission limitation or standard.

The tanks are equipped with a pressure-vacuum relief valve as the add-on control device that does not meet the CAM’s definition of a control device. Therefore, the emission units are not subject to CAM.
h. S-381-83-1, -84-1, -91-1, and -92-1 – Steel Wine and Spirit Storage and White Wine Fermentation Tanks

The emission units have a condition that the temperature of the wine stored shall not exceed 75 °F which is based on the storage provisions of District Rule 4694. This requirement meets CAM’s definition of an emission limitation or standard.

The tanks are equipped with a pressure-vacuum relief valve as the add-on control device that does not meet the CAM’s definition of a control device. Therefore, the emission units are not subject to CAM.

These permit units have no emissions limits for any criteria pollutants. Therefore, the permit units are not subject to CAM.

The emission units have a condition that the temperature of the wine stored shall not exceed 75 °F which is based on the storage provisions of District Rule 4694. This requirement meets CAM’s definition of an emission limitation or standard.

The tanks are equipped with a pressure-vacuum relief valve as the add-on control device that does not meet the CAM’s definition of a control device. Therefore, the emission units are not subject to CAM.

These permit units have no emissions limits for any criteria pollutants. Therefore, the permit units are not subject to CAM.

28. 40 CFR Part 82, Subpart B and F – Stratospheric Ozone

There are applicable requirements from Title VI of the CAA (Stratospheric Ozone) that apply to all sources in general. These requirements pertain to air conditioners, chillers, and refrigerators located at a Title V source and
to disposal of air conditioners or maintenance/recharging/disposal of
motor vehicle air conditioners (MVAC).

a. S-381-0-1: Facility-Wide Requirements

- Conditions 27 and 28 on the requirements for the proposed permit
  comply with this rule.

X. PERMIT SHIELD

A permit shield legally protects a facility from enforcement of the shielded
regulations when a source is in compliance with the terms and conditions of the
Title V permit. Compliance with the terms and conditions of the Operating Permit
is considered compliance with all applicable requirements upon which those
conditions are based, including those that have been subsumed.

A. Requirements Addressed by Model General Permit Templates

  The applicant has not requested to utilize any model general permit
  templates.

B. Requirements not Addressed by Model General Permit Templates

  The applicant has not requested permit shield for any requirements not
  addressed by model general permit templates.

XI. PERMIT CONDITIONS

See draft operating permit beginning on the following page.
San Joaquin Valley
Air Pollution Control District

FACILITY: S-381-0-1
EXPIRATION DATE: 12/31/2012

FACILITY WIDE REQUIREMENTS

1. The owner or operator shall notify the District of any breakdown condition as soon as reasonably possible, but no later than one hour after its detection, unless the owner or operator demonstrates to the District’s satisfaction that the longer reporting period was necessary. [District Rule 1100, 6.1 and Kern County Rule 111] Federally Enforceable Through Title V Permit

2. The District shall be notified in writing within ten days following the correction of any breakdown condition. The breakdown notification shall include a description of the equipment malfunction or failure, the date and cause of the initial failure, the estimated emissions in excess of those allowed, and the methods utilized to restore normal operations. [District Rule 1100, 7.0 and Kern County Rule 111] Federally Enforceable Through Title V Permit

3. The owner or operator of any stationary source operation that emits more than 25 tons per year of nitrogen oxides or reactive organic compounds, shall provide the District annually with a written statement in such form and at such time as the District prescribes, showing actual emissions of nitrogen oxides and reactive organic compounds from that source. [District Rule 1160, 5.0] Federally Enforceable Through Title V Permit

4. Any person building, altering or replacing any operation, article, machine, equipment, or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate, reduce, or control the issuance of air contaminants, shall first obtain an Authority to Construct (ATC) from the District unless exempted by District Rule 2020 (12/20/07). [District Rule 2010, 3.0 and 4.0; and 2020] Federally Enforceable Through Title V Permit

5. The permittee must comply with all conditions of the permit including permit revisions originated by the District. All terms and conditions of a permit that are required pursuant to the Clean Air Act (CAA), including provisions to limit potential to emit, are enforceable by the EPA and Citizens under the CAA. Any permit noncompliance constitutes a violation of the CAA and the District Rules and Regulations, and is grounds for enforcement action, for permit termination, revocation, reopening and reissuance, or modification; or for denial of a permit renewal application. [District Rules 2070, 7.0; 2080; and 2520, 9.9.1 and 9.13.1] Federally Enforceable Through Title V Permit

6. A Permit to Operate or an Authority to Construct shall not be transferred unless a new application is filed with and approved by the District. [District Rule 2031] Federally Enforceable Through Title V Permit

7. Every application for a permit required under Rule 2010 (12/17/92) shall be filed in a manner and form prescribed by the District. [District Rule 2040] Federally Enforceable Through Title V Permit

8. The operator shall maintain records of required monitoring that include: 1) the date, place, and time of sampling or measurement; 2) the date(s) analyses were performed; 3) the company or entity that performed the analysis; 4) the analytical techniques or methods used; 5) the results of such analysis; and 6) the operating conditions at the time of sampling or measurement. [District Rule 2520, 9.4.1] Federally Enforceable Through Title V Permit

9. The operator shall retain records of all required monitoring data and support information for a period of at least 5 years from the date of the monitoring sample, measurement, or report. Support information includes copies of all reports required by the permit and, for continuous monitoring instrumentation, all calibration and maintenance records and all original strip-chart recordings. [District Rule 2520, 9.4.2] Federally Enforceable Through Title V Permit

FACILITY WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate. Any amendments to these Facility-wide Requirements that affect specific Permit Units may constitute modification of those Permit Units.

Facility Name: HECK CELLARS
Location: 15401 BEAR MOUNTAIN WINERY RD,DIGIORGIO, CA 93203-9743

S-381-0-1 / Aug 23 2012 8:54AM - SONGCOJ
10. {4371} The operator shall submit reports of any required monitoring at least every six months unless a different frequency is required by an applicable requirement. All instances of deviations from permit requirements must be clearly identified in such reports. [District Rule 2520, 9.5.1] Federally Enforceable Through Title V Permit

11. {4372} Deviations from permit conditions must be promptly reported, including deviations attributable to upset conditions, as defined in the permit. For the purpose of this condition, promptly means as soon as reasonably possible, but no later than 10 days after detection. The report shall include the probable cause of such deviations, and any corrective actions or preventive measures taken. All required reports must be certified by a responsible official consistent with section 10.0 of District Rule 2520 (6/21/01). [District Rules 2520, 9.5.2 and 1100, 7.0] Federally Enforceable Through Title V Permit

12. {4373} If for any reason a permit requirement or condition is being challenged for its constitutionality or validity by a court of competent jurisdiction, the outcome of such challenge shall not affect or invalidate the remainder of the conditions or requirements in that permit. [District Rule 2520, 9.7] Federally Enforceable Through Title V Permit

13. {4374} It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit. [District Rule 2520, 9.8.2] Federally Enforceable Through Title V Permit

14. {4375} The permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition. [District Rule 2520, 9.8.3] Federally Enforceable Through Title V Permit

15. {4376} The permit does not convey any property rights of any sort, or any exclusive privilege. [District Rule 2520, 9.8.4] Federally Enforceable Through Title V Permit

16. {4377} The Permittee shall furnish to the District, within a reasonable time, any information that the District may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the District copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee may furnish such records directly to EPA along with a claim of confidentiality. [District Rule 2520, 9.8.5] Federally Enforceable Through Title V Permit

17. {4378} The permittee shall pay annual permit fees and other applicable fees as prescribed in Regulation III of the District Rules and Regulations. [District Rule 2520, 9.9] Federally Enforceable Through Title V Permit

18. {4379} Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to enter the permittee's premises where a permitted source is located or emissions related activity is conducted, or where records must be kept under condition of the permit. [District Rule 2520, 9.13.2.1] Federally Enforceable Through Title V Permit

19. {4380} Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit. [District Rule 2520, 9.13.2.2] Federally Enforceable Through Title V Permit

20. {4381} Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to inspect at reasonable times any facilities, equipment, practices, or operations regulated or required under the permit. [District Rule 2520, 9.13.2.3] Federally Enforceable Through Title V Permit

21. {4382} Upon presentation of appropriate credentials, a permittee shall allow an authorized representative of the District to sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the permit or applicable requirements. [District Rule 2520, 9.13.2.4] Federally Enforceable Through Title V Permit

FACILITY-WIDE REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.
22. {4383} No air contaminants shall be discharged into the atmosphere for a period or periods aggregating more than 3 minutes in any one hour which is as dark or darker than Ringelmann #1 or equivalent to 20% opacity and greater, unless specifically exempted by District Rule 4101 (02/17/05). If the equipment or operation is subject to a more stringent visible emission standard as prescribed in a permit condition, the more stringent visible emission limit shall supersede this condition. [District Rule 4101, and County Rules 401 (in all eight counties in the San Joaquin Valley)] Federally Enforceable Through Title V Permit

23. {4384} No person shall manufacture, blend, repackage, supply, sell, solicit or apply any architectural coating with a VOC content in excess of the corresponding limit specified in Table of Standards 1 effective until 12/30/10 or Table of Standards 2 effective on and after 1/1/11 of District Rule 4601 (12/17/09) for use or sale within the District. [District Rule 4601, 5.1] Federally Enforceable Through Title V Permit

24. {4385} All VOC-containing materials subject to Rule 4601 (12/17/09) shall be stored in closed containers when not in use. [District Rule 4601, 5.4] Federally Enforceable Through Title V Permit

25. {4386} The permittee shall comply with all the Labeling and Test Methods requirements outlined in Rule 4601 sections 6.1 and 6.3 (12/17/09). [District Rule 4601, 6.1 and 6.3] Federally Enforceable Through Title V Permit

26. {4387} With each report or document submitted under a permit requirement or a request for information by the District or EPA, the permittee shall include a certification of truth, accuracy, and completeness by a responsible official. [District Rule 2520, 9.13.1 and 10.0] Federally Enforceable Through Title V Permit

27. {4388} If the permittee performs maintenance on, or services, repairs, or disposes of appliances, the permittee shall comply with the standards for Recycling and Emissions Reduction pursuant to 40 CFR Part 82, Subpart F. [40 CFR 82 Subpart F] Federally Enforceable Through Title V Permit

28. {4389} If the permittee performs service on motor vehicles when this service involves the ozone-depleting refrigerant in the motor vehicle air conditioner (MVAC), the permittee shall comply with the standards for Servicing of Motor Vehicle Air Conditioners pursuant to all the applicable requirements as specified in 40 CFR Part 82, Subpart B. [40 CFR Part 82, Subpart B] Federally Enforceable Through Title V Permit

29. {4390} Disturbances of soil related to any construction, demolition, excavation, extraction, or other earthmoving activities shall comply with the requirements for fugitive dust control in District Rule 8021 unless specifically exempted under Section 4.0 of Rule 8021 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8021 and 8011] Federally Enforceable Through Title V Permit

30. {4391} Outdoor handling, storage and transport of any bulk material which emits dust shall comply with the requirements of District Rule 8031, unless specifically exempted under Section 4.0 of Rule 8031 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8031 and 8011] Federally Enforceable Through Title V Permit

31. {4392} An owner/operator shall prevent or cleanup any carryout or trackout in accordance with the requirements of District Rule 8041 Section 5.0, unless specifically exempted under Section 4.0 of Rule 8041 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8041 and 8011] Federally Enforceable Through Title V Permit

32. {4393} Whenever open areas are disturbed, or vehicles are used in open areas, the facility shall comply with the requirements of Section 5.0 of District Rule 8051, unless specifically exempted under Section 4.0 of Rule 8051 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8051 and 8011] Federally Enforceable Through Title V Permit

33. {4394} Any paved road or unpaved road shall comply with the requirements of District Rule 8061 unless specifically exempted under Section 4.0 of Rule 8061 (8/19/2004) or Rule 8011 (8/19/2004). [District Rule 8061 and 8011] Federally Enforceable Through Title V Permit
34. {4395} Any unpaved vehicle/equipment area that anticipates more than 50 Average annual daily Trips (AADT) shall comply with the requirements of Section 5.1.1 of District Rule 8071. Any unpaved vehicle/equipment area that anticipates more than 150 vehicle trips per day (VDT) shall comply with the requirements of Section 5.1.2 of District Rule 8071. On each day that 25 or more VDT with 3 or more axles will occur on an unpaved vehicle/equipment traffic area, the owner/operator shall comply with the requirements of Section 5.1.3 of District Rule 8071. On each day when a special event will result in 1,000 or more vehicles that will travel/park on an unpaved area, the owner/operator shall comply with the requirements of Section 5.1.4 of District Rule 8071. All sources shall comply with the requirements of Section 5.0 of District Rule 8071 unless specifically exempted under Section 4.0 of Rule 8071 (9/16/2004) or Rule 8011 (8/19/2004). [District Rule 8071 and Rule 8011] Federally Enforceable Through Title V Permit

35. {4396} Any owner or operator of a demolition or renovation activity, as defined in 40 CFR 61.141, shall comply with the applicable inspection, notification, removal, and disposal procedures for asbestos containing materials as specified in 40 CFR 61.145 (Standard for Demolition and Renovation). [40 CFR 61 Subpart M] Federally Enforceable Through Title V Permit

36. {4397} The permittee shall submit certifications of compliance with the terms and standards contained in Title V permits, including emission limits, standards and work practices, to the District and the EPA annually (or more frequently as specified in an applicable requirement or as specified by the District). The certification shall include the identification of each permit term or condition, the compliance status, whether compliance was continuous or intermittent, the methods used for determining the compliance status, and any other facts required by the District to determine the compliance status of the source. [District Rule 2520, 9.16] Federally Enforceable Through Title V Permit

37. {4398} The permittee shall submit an application for Title V permit renewal to the District at least six months, but not greater than 18 months, prior to the permit expiration date. [District Rule 2520, 5.2] Federally Enforceable Through Title V Permit

38. {4399} When a term is not defined in a Title V permit condition, the definition in the rule cited as the origin and authority for the condition in a Title V permits shall apply. [District Rule 2520, 9.1.1] Federally Enforceable Through Title V Permit

39. {98} No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

40. This facility shall annually achieve the Required Annual Emission Reductions (RAER) as specified in the facility's APCO-approved Three-Year Compliance Plan for District Rule 4694. [District Rule 4694]

41. A Three-Year Compliance Plan that demonstrates compliance with the requirements of Section 5.1 of District Rule 4694 for each year of the applicable compliance period shall be submitted to the District every three years on or before December 1. [District Rule 4694]

42. A Three-Year Compliance Plan Verification that demonstrates that the Three-Year Compliance Plan elements are in effect shall be submitted to the District every three years on or before July 1. [District Rule 4694]

43. An Annual Compliance Plan Demonstration that shows compliance with the applicable requirements of this rule shall be submitted to the District every year on or before February 1. [District Rule 4694]

44. Operators using CER to mitigate fermentation emissions shall perform all monitoring and recordkeeping, as established in their approved Three-Year Compliance Plan, and shall maintain all records necessary to demonstrate compliance. [District Rule 4694]

45. On month, day, year, the initial Title V permit was issued. The reporting periods for the Report of Required Monitoring and the Compliance Certification Report are based upon this initial permit issuance date, unless alternative dates are approved by the District Compliance Division. These reports are due within 30 days after the end of the reporting period. [District Rule 2520] Federally Enforceable Through Title V Permit
PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit

2. Engine shall be equipped with a turbocharger. [District Rule 2201] Federally Enforceable Through Title V Permit

3. This engine shall be equipped with an operational non-resetable elapsed time meter or other APCO approved alternative. [District Rule 4702, 40 CFR 63.6625(f), and 17 CCR 93115] Federally Enforceable Through Title V Permit

4. This engine shall be operated and maintained in proper operating condition as recommended by the engine manufacturer or emissions control system supplier. [District Rule 4702] Federally Enforceable Through Title V Permit

5. Only CARB certified diesel fuel containing not more than 0.0015% sulfur by weight is to be used. [District Rules 2201 and 4801 and 17 CCR 93115] Federally Enforceable Through Title V Permit

6. During periods of operation for maintenance, testing, and required regulatory purposes, the permittee shall monitor the operational characteristics of the engine as recommended by the manufacturer or emission control system supplier (for example: check engine fluid levels, battery, cables and connections; change engine oil and filters; replace engine coolant; and/or other operational characteristics as recommended by the manufacturer or supplier). [District Rule 4702] Federally Enforceable Through Title V Permit

7. The permittee shall maintain monthly records of emergency and non-emergency operation. Records shall include the number of hours of emergency operation, the date and number of hours of all testing and maintenance operations, the purpose of the operation (for example: load testing, weekly testing, rolling blackout, general area power outage, etc.) and records of operational characteristics monitoring. For units with automated testing systems, the operator may, as an alternative to keeping records of actual operation for testing purposes, maintain a readily accessible written record of the automated testing schedule. [District Rule 4702 and 17 CCR 93115] Federally Enforceable Through Title V Permit

8. An emergency situation is an unscheduled electrical power outage caused by sudden and reasonably unforeseen natural disasters or sudden and reasonably unforeseen events beyond the control of the permittee. [District Rule 4702] Federally Enforceable Through Title V Permit

9. This engine shall not be used to produce power for the electrical distribution system, as part of a voluntary utility demand reduction program, or for an interruptible power contract. [District Rule 4702] Federally Enforceable Through Title V Permit

10. This engine shall be operated only for testing and maintenance of the engine, required regulatory purposes, and during emergency situations. Operation of the engine for maintenance, testing, and required regulatory purposes shall not exceed 20 hours per calendar year. [District Rule 4702, 40 CFR 63.6640(f)(ii), and 17 CCR 93115] Federally Enforceable Through Title V Permit
11. The permittee shall maintain monthly records of the type of fuel purchased, the amount of fuel purchased, date when the fuel was purchased, signature of the permittee who received the fuel, and signature of the fuel supplier indicating that the fuel was delivered. [2520, 9.3.2 and 17 CCR 93115] Federally Enforceable Through Title V Permit

12. All records shall be maintained and retained on-site for a minimum of five (5) years, and shall be made available for District inspection upon request. [District Rule 4702, 40 CFR 63.6660, and 17 CCR 93115] Federally Enforceable Through Title V Permit

13. On and after May 3, 2013, the permittee must minimize the engine's time spent at idle during startup and minimize the engine's startup time to a period needed for appropriate and safe loading of the engine, not to exceed 30 minutes. [40 CFR 63.6625(h)] Federally Enforceable Through Title V Permit

15. On and after May 3, 2013, the engine's oil and filter shall be changed every 500 hours of operation or every 12 months, whichever comes first. [40 CFR 63.6603/63.6640 Table 2d, Row 4.a] Federally Enforceable Through Title V Permit

16. On and after May 3, 2013, the engine's air filter shall be inspected every 1,000 hours of operation or every 12 months, whichever comes first, and replaced as necessary. [40 CFR 63.6603/63.6640 Table 2d, Row 4.b] Federally Enforceable Through Title V Permit

17. On and after May 3, 2013, the engine's hoses and belts shall be inspected every 500 hours of operation or every 12 months, whichever comes first, and replaced as necessary. [40 CFR 63.6603/63.6640 Table 2d, Row 4.c] Federally Enforceable Through Title V Permit

18. On and after May 3, 2013, the permittee shall maintain monthly records of all performance tests, opacity and visible emissions observations and required maintenance performed on the air pollution control and monitoring equipment. [40 CFR 63.6655(a)(3)/63.10(b)(2)(viii) and §63.6655(a)(4)] Federally Enforceable Through Title V Permit

19. On and after May 3, 2013, the permittee shall maintain monthly records of the occurrence and duration of each malfunction of operation (i.e., process equipment) or the air pollution control and monitoring equipment. The permittee shall also maintain monthly records of action taken during periods of malfunction to minimize emissions in accordance with §63.6605(b), including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation. [40 CFR 63.6655(a)(2) and (a)(5)] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-9-2
SECTION: 02  TOWNSHIP: 31S  RANGE: 29E
EQUIPMENT DESCRIPTION:
26 MMBTU/HR NATURAL GAS-FIRED BOILER WITH FGR, ZINC RAPID MIX FRMB 19-G-600 LOW NOX BURNER

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit

2. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit

3. The unit shall only be fired on PUC-regulated natural gas. [District Rule 2201] Federally Enforceable Through Title V Permit

4. Emissions rates from the natural gas-fired unit shall not exceed any of the following limits: 7 ppmv NOx @ 3% O2 or 0.008 lb-NOx/MMBtu, 0.00285 lb-SOx/MMBtu, 0.0075 lb-PM10/MMBtu, or 100 ppmv CO @ 3% O2. [District Rules 2201, 4305, 4306, 4320] Federally Enforceable Through Title V Permit

5. The permittee shall monitor and record the stack concentration of NOX, CO, and O2 at least once every month (in which a source test is not performed) using a portable analyzer that meets District specifications. Monitoring shall not be required if the unit is not in operation, i.e. the unit need not be started solely to perform monitoring. Monitoring shall be performed within 5 days of restarting the unit unless monitoring has been performed within the last month. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

6. If either the NOX or CO concentrations corrected to 3% O2, as measured by the portable analyzer, exceed the allowable emissions concentration, the permittee shall return the emissions to within the acceptable range as soon as possible, but no longer than 1 hour of operation after detection. If the portable analyzer readings continue to exceed the allowable emissions concentration after 1 hour of operation after detection, the permittee shall notify the District within the following 1 hour and conduct a certified source test within 60 days of the first exceedance. In lieu of conducting a source test, the permittee may stipulate a violation has occurred, subject to enforcement action. The permittee must then correct the violation, show compliance has been re-established, and resume monitoring procedures. If the deviations are the result of a qualifying breakdown condition pursuant to Rule 1100, the permittee may fully comply with Rule 1100 in lieu of performing the notification and testing required by this condition. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

7. All alternate monitoring parameter emission readings shall be taken with the unit operating either at conditions representative of normal operations or conditions specified in the permit-to-operate. The analyzer shall be calibrated, maintained, and operated in accordance with the manufacturer's specifications and recommendations or a protocol approved by the APCO. Emission readings taken shall be averaged over a 15 consecutive-minute period by either taking a cumulative 15 consecutive-minute sample reading or by taking at least five (5) readings, evenly spaced out over the 15 consecutive-minute period. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

Facility Name: HECK CELLARS
Location: 15401 BEAR MOUNTAIN WINERY RD, DIGIORGIO, CA 95203-9743
5-31-12 - Aug 23 2012 8:58AM - SONGDU

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.
8. The permittee shall maintain records of: (i) the date and time of NOX, CO, and O2 measurements, (2) the O2 concentration in percent by volume and the measured NOX and CO concentrations corrected to 3% O2, (3) make and model of exhaust gas analyzer, (4) exhaust gas analyzer calibration records, and (5) a description of any corrective action taken to maintain the emissions within the acceptable range. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

9. All emissions measurements shall be made with the unit operating either at conditions representative of normal operations or conditions specified in the Permit to Operate. No determination of compliance shall be established within two hours after a continuous period in which fuel flow to the unit is shut off for 30 minutes or longer, or within 30 minutes after a re-ignition as defined in Section 3.0 of District Rule 4306. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

10. All alternate monitoring parameter emission readings shall be taken with the unit operating either at conditions representative of normal operations or conditions specified in the Permit to Operate. The analyzer shall be calibrated, maintained, and operated in accordance with the manufacturer's specifications and recommendations or a protocol approved by the APCO. Emission readings taken shall be averaged over a 15 consecutive-minute period by either taking a cumulative 15 consecutive-minute sample reading or by taking at least five (5) readings, evenly spaced out over the 15 consecutive-minute period. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

11. This unit shall be tested for compliance with the NOx and CO emissions limits at least once every twelve (12) months. After demonstrating compliance on two (2) consecutive annual source tests, the unit shall be tested not less than once every thirty-six (36) months. If the result of the 36-month source test demonstrates that the unit does not meet the applicable emission limits, the source testing frequency shall revert to at least once every twelve (12) months. [District Rules 4305, 4306 and 4320] Federally Enforceable Through Title V Permit

12. The source test plan shall identify which basis (ppmv or lb/MMBtu) will be used to demonstrate compliance. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

13. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified at least 30 days prior to any compliance source test, and a source test plan must be submitted for approval at least 15 days prior to testing. [District Rule 1081] Federally Enforceable Through Title V Permit

14. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit

15. The following test methods shall be used: NOx (ppmv) - EPA Method 7E or ARB Method 100, NOx (lb/MMBtu) - EPA Method 19, CO (ppmv) - EPA Method 10 or ARB Method 100, stack gas oxygen - EPA Method 3 or 3A or ARB Method 100. [District Rules 1081, 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

16. For emissions source testing, the arithmetic average of three 30-consecutive-minute test runs shall apply. If two of three runs are above an applicable limit the test cannot be used to demonstrate compliance with an applicable limit. [District Rules 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

17. The owner or operator shall record and maintain records of the amount of fuel combusted during each operating day. [40 CFR 60.48c(g)(1)] Federally Enforceable Through Title V Permit

18. All records shall be maintained and retained on-site for a minimum of five (5) years, and shall be made available for District inspection upon request. [District Rules 1070, 4305, 4306, and 4320] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley Air Pollution Control District

PERMIT UNIT: S-381-10-3
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
33,310 BARREL CAPACITY BRANDY STORAGE AND AGING OPERATION (BUILDINGS K & L) SERVED BY A 0.289 MMBTU/HR ADWEST TECHNOLOGIES MODEL RETOX 1.0 RTO95 PRIMARY REGENERATIVE THERMAL OXIDIZER (SMALL RTO) AND 1.156 MMBTU/HR ADWEST TECHNOLOGIES MODEL RETOX 4.0 RTO95 SECONDARY RTO (LARGE RTO)

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit

2. All brandy storage and aging operations at this facility shall only be performed in Buildings K and L. [District Rules 2201 and 4694] Federally Enforceable Through Title V Permit

3. Only PUC-regulated natural gas shall be used as supplemental fuel for the regenerative thermal oxidizers. [District Rule 2201] Federally Enforceable Through Title V Permit

4. The brandy storage enclosures and regenerative thermal oxidation system shall be maintained in proper operating condition at all times. [District Rule 2201] Federally Enforceable Through Title V Permit

5. The facility shall notify the District of any occurrence which constitutes a breakdown condition of the VOC control system pursuant to District Rule 1100. [District Rule 2201 and District Rule 1100] Federally Enforceable Through Title V Permit

6. Manway access doors are defined as doors with a maximum opening of 21 square feet, intended solely for occasional personnel access to the warehouse for maintenance or monitoring activities. [District Rule 2201] Federally Enforceable Through Title V Permit

7. Non-manway access doors are defined as openings equipped with roll-up doors which are required to allow routine movement of brandy into and out of the warehouse or for warehouse access with wheeled and motorized maintenance equipment. [District Rule 2201] Federally Enforceable Through Title V Permit

8. All openings in the warehouse enclosures which may be opened during "normal operation" of the VOC control system and which do not qualify as manway access doors or non-manway access doors shall be considered to be Natural Draft Openings (NDO) for purposes of certification of the enclosure as a Permanent Total Enclosure pursuant to U.S. EPA Method 204. [District Rule 2201] Federally Enforceable Through Title V Permit

9. "Normal operation" is defined for each warehouse building enclosure as operation with the enclosure meeting the minimum requirements for a permanent total enclosure pursuant to EPA Method 204 (with the fan inlet pressure operating with a vacuum at or higher than the minimum allowed vacuum and all non-manway access doors closed) and the regenerative thermal oxidizer system fully operational with the combustion chamber temperature at or above 1400 degrees F. [District Rule 2201] Federally Enforceable Through Title V Permit

10. The facility shall be equipped with a continuous monitoring system to monitor, at a minimum, the status of the fan inlet pressure control, all non-manway access doors and the combustion chamber temperature of each in-service RTO. Actual hours of "normal operation" shall be continuously and automatically monitored and recorded for each warehouse building enclosure. [District Rule 2201] Federally Enforceable Through Title V Permit

Facility Name: HECK CELLARS
Location: 15401 BEAR MOUNTAIN WINERY RD. DIGIORGIO, CA 95203-9743
S-381-10-3 - 49-13 2012 10-45AM - SROOOU
11. Buildings K and L shall be certified and maintained as Permanent Total Enclosures (PTE) pursuant to U.S. EPA Method 204. [District Rule 2201] Federally Enforceable Through Title V Permit

12. Certification of Buildings K and L as Permanent Total Enclosures shall be performed by a District-approved independent certifying entity. [District Rule 2201] Federally Enforceable Through Title V Permit

13. Each manway access door shall be equipped with an automatic closure device to minimize the time that the door is open. Manway access doors shall be opened only as required for access to or exit from the enclosure, minimizing the duration of the opening, and shall not be propped open. [District Rule 2201] Federally Enforceable Through Title V Permit

14. Each non-manway access opening shall be equipped with a motor-actuated door and controls which will minimize the time the door remains open during access and exit and shall be integrated with the continuous monitoring system to record the time periods that the door is open. [District Rules 1080 and 2201] Federally Enforceable Through Title V Permit

15. The fan inlet pressure control point shall be equipped with a continuous pressure monitor integrated with the facility's continuous monitoring system to continuously record the actual fan inlet vacuum. [District Rules 1080 and 2201] Federally Enforceable Through Title V Permit

16. The measured vacuum at the fan inlet pressure control point shall not be less than the established minimum allowable vacuum during "normal operation." [District Rule 2201] Federally Enforceable Through Title V Permit

17. Each month the facility shall demonstrate that control of the ID fan inlet pressure at or above the established minimum allowable vacuum is adequate to simultaneously maintain the qualification of all enclosures (Buildings K and L) as Permanent Total Enclosures pursuant to EPA Method 204 by manually measuring and recording facial velocity at the test port opening on each warehouse building enclosure and confirming a minimum facial velocity of 200 feet per minute at each port. If a velocity less than 200 feet per minute is determined, operating adjustments shall be made as required to increase the measured facial velocity to 200 feet per minute within 24 hours of the initial measurement. If the permittee is unable to demonstrate a minimum facial velocity of 200 feet per minute within 48 hours after initial measurement, permittee shall notify the APCO within 72 hours of the initial measurement. After 12 consecutive months of demonstrating the adequacy of the established minimum allowable vacuum, the monitoring frequency can be reduced to once per quarter per warehouse building enclosure. [District Rule 2201] Federally Enforceable Through Title V Permit

18. The induced draft fan and RTO serving the warehouse building enclosures shall be adequately sized to simultaneously maintain "normal operation" for all warehouse building enclosures during periods of maximum brandy loss from the storage and aging operation. [District Rule 2201] Federally Enforceable Through Title V Permit

19. At least one regenerative thermal oxidizer shall operate at all times. [District Rule 2201] Federally Enforceable Through Title V Permit

20. The minimum allowable vacuum at the fan inlet pressure control point, adequate to ensure maintenance of a continuous negative pressure on all warehouse storage enclosures as required to simultaneously qualify all enclosures as Permanent Total Enclosures pursuant to EPA Method 204, shall be demonstrated and recorded annually. [District Rules 1080 and 2201] Federally Enforceable Through Title V Permit

21. Each regenerative thermal oxidizer shall be equipped with a dedicated isolation damper to isolate it from the brandy warehouse when not in operation. The isolation damper shall not be opened unless the regenerative thermal oxidizer it serves is fully operational with a combustion chamber temperature not less than 1400 F. [District Rule 2201] Federally Enforceable Through Title V Permit

22. Each regenerative thermal oxidizer shall be equipped with an operational temperature gauge to indicate the temperature of the combustion chamber. A continuously recording device integrated with the facility's continuous monitoring system shall be utilized to indicate the combustion chamber temperature during operation. [District Rules 1080 and 2201] Federally Enforceable Through Title V Permit
23. Each regenerative thermal oxidizer shall operate with a combustion chamber temperature of not less than 1400°F when its isolation damper is open to the warehouse. Upon detecting any temperature excursion less than 1400°F, the permittee shall investigate the excursion and take corrective action to minimize excessive emissions and prevent recurrence of the excursion as expeditiously as practicable. [District Rule 2201 and 40 CFR part 64] Federally Enforceable Through Title V Permit

24. The VOC destruction efficiency of each regenerative thermal oxidizer shall not be less than 98%. [District Rule 2201] Federally Enforceable Through Title V Permit

25. Routine scheduled maintenance which requires shutdown of the primary (larger) regenerative thermal oxidizer shall not be performed during the months of July, August, or September. [District Rule 2201] Federally Enforceable Through Title V Permit

26. Total evaporative emissions from brandy shall not exceed 46,108 lb-VOC/year based on a 12-month rolling basis. [District Rule 2201] Federally Enforceable Through Title V Permit

27. The total evaporative brandy VOC emissions shall be quantified by the sum of the evaporative brandy VOC emissions emitted to the atmosphere from each warehouse building enclosure based on a 12-month rolling basis. Evaporative losses from each warehouse building enclosure shall be calculated by the following formula: Evaporative Brandy VOC Emissions (tons/year-enclosure) = Uncontrolled Emissions (tons/year-enclosure) x Control Factor. Uncontrolled Emissions = the average enclosure inventory for the year (bbls/enclosure) x the measured brandy loss per barrel for the year in the enclosure (PG/bbl-year) x 3.31 lb-VOC/PG. The Control Factor for the year = (8,760-0.98xH)/8,760, where H is hours of "normal operation" for the enclosure (as defined in this permit) recorded based on a 12-month rolling basis. [District Rule 2201] Federally Enforceable Through Title V Permit

28. Combined VOC emissions from the exhaust of the regenerative thermal oxidizers shall not exceed 81.0 lb/day during "normal operation." [District Rule 2201] Federally Enforceable Through Title V Permit

29. The emissions from the combustion of natural gas or LPG shall not exceed any of the following limits: 0.494 lb-NOx/MMBtu, 0.084 lb-CO/MMBtu, 0.0076 lb-PM10/MMBtu, 0.0055 lb-VOC/MMBtu, or 0.00285 lb-SOx/MMBtu. [District Rule 2201] Federally Enforceable Through Title V Permit

30. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified at least 30 days prior to any compliance source test, and a source test plan must be submitted for approval at least 15 days prior to testing. [District Rule 2201] Federally Enforceable Through Title V Permit

31. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081] Federally Enforceable Through Title V Permit

32. Each regenerative thermal oxidizer (RTO) shall be tested for compliance with VOC emissions limits and to demonstrate the destruction efficiency of the RTO at least once every 12 months. After an RTO has demonstrated compliance on two consecutive annual source tests, it shall be tested not less than once every thirty-six months. [District Rules 1081 and 2201] Federally Enforceable Through Title V Permit

33. VOC emissions for source test purposes shall be determined using US EPA Method 25 or Method 18 or BAAQMD ST-32, except when the outlet concentration must be below 50 ppmv in order to meet the standard, in which case US EPA Method 25a may be used. VOC emissions during the source test shall be calculated as the arithmetic average of three 30-consecutive-minute test runs. [District Rule 2201] Federally Enforceable Through Title V Permit

34. Daily and annual records of the hours of operation shall be kept, indicating the time and duration of all periods of outage for the VOC control system including maintenance. [District Rule 2201] Federally Enforceable Through Title V Permit

35. Records shall be kept of all maintenance activities requiring a shutdown of a regenerative thermal oxidizer, including the maintenance activity, time and date of shutdown of the regenerative thermal oxidizer, and the duration of the shutdown. [District Rule 2201] Federally Enforceable Through Title V Permit

36. Records of all required monitoring including facial velocity measurements and annual evaporative VOC emissions shall be maintained. [District Rule 2201] Federally Enforceable Through Title V Permit
37. Daily and annual records of the number of barrels in each warehouse storage enclosure shall be kept. [District Rule 2201] Federally Enforceable Through Title V Permit

38. Records of all barrel filling and dumping operations shall be kept, recording the proof gallons placed into storage, the proof gallons removed from storage, the proof gallons lost while in storage and the date of each action. Annual summaries of all filling and dumping operations shall be maintained to allow annual determination of total proof-gallons lost from each warehouse building enclosure. All gauging of distilled spirits shall be in accordance with the methods and procedures of the Gauging Manual of the Alcohol and Tobacco Tax and Trade Bureau, Department of the Treasury (27 CFR 30). [District Rule 2201] Federally Enforceable Through Title V Permit

39. All records shall be retained for a minimum of five years, and shall be made available for District inspection upon request. [District Rule 2201 and 40 CFR part 64] Federally Enforceable Through Title V Permit

40. Each regenerative thermal oxidizer temperature monitoring device shall be calibrated, maintained, and operated according to the manufacturer's specifications. [40 CFR part 64] Federally Enforceable Through Title V Permit

41. Each regenerative thermal oxidizer and its associated components shall be inspected on an annual basis. The records of inspection shall at least contain date and time of inspection, identification of the person performing an inspection, parts replacement and repairs, and all maintenance actions taken. The records shall be kept and maintained for compliance inspection upon request. [40 CFR part 64] Federally Enforceable Through Title V Permit

42. The permittee shall comply with the compliance assurance monitoring operation and maintenance requirements of 40 CFR part 64.7. [40 CFR part 64] Federally Enforceable Through Title V Permit

43. If the District or EPA determine that a Quality Improvement Plan is required under 40 CFR 64.7(d)(2), the permittee shall develop and implement the Quality Improvement Plan in accordance with 40 CFR part 64.8. [40 CFR part 64] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-11-1

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
240 BHP CLARKE MODEL JU6H-UF60 TIER 2 CERTIFIED DIESEL-FIRED EMERGENCY IC ENGINE POWERING A FIRE WATER PUMP

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit

2. Only CARB certified diesel fuel containing not more than 0.0015% sulfur by weight is to be used. [District Rules 2201, 4801, 40 CFR 60.4207 (b), and 17 CCR 93115] Federally Enforceable Through Title V Permit

3. This engine shall be equipped with an operational non-resettable elapsed time meter or other APCO approved alternative. [District Rule 4702] Federally Enforceable Through Title V Permit

4. This engine shall be operated only for maintenance, testing, required regulatory purposes, and during emergency situations. For testing purposes, the engine shall only be operated the number of hours necessary to comply with the testing requirements of the National Fire Protection Association (NFPA) 25 - "Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems", 1998 edition. Total hours of operation for all maintenance, testing, and required regulatory purposes shall not exceed 100 hours per calendar year. [District Rule 4702 and 17 CCR 93115] Federally Enforceable Through Title V Permit

5. Emissions from this IC engine shall not exceed any of the following limits: 4.5 g-NOx/bhp-hr, 0.59 g-CO/bhp-hr, or 1.4 g-VOC/bhp-hr. [District Rule 2201, 40 CFR 60.4205(c), 13 CCR 2423, and 17 CCR 93115] Federally Enforceable Through Title V Permit

6. Emissions from this IC engine shall not exceed 0.14 g-PM10/bhp-hr based on USEPA certification using ISO 8178 test procedure. [District Rules 2201, 4102, 40 CFR 60.4205(c), 13 CCR 2423, and 17 CCR 93115] Federally Enforceable Through Title V Permit

7. The exhaust stack shall vent vertically upward. The vertical exhaust flow shall not be impeded by a rain cap (flapper ok), roof overhang, or any other obstruction. [District Rule 4102]

8. The permittee shall maintain monthly records of emergency and non-emergency operation. Records shall include the number of hours of emergency operation, the date and number of hours of all testing and maintenance operations, and the purpose of the operation (for example: load testing, weekly testing, rolling blackout, general area power outage, etc.). For units with automated testing systems, the operator may, as an alternative to keeping records of actual operation for testing purposes, maintain a readily accessible written record of the automated testing schedule. [District Rule 4702 and 17 CCR 93115] Federally Enforceable Through Title V Permit

9. This engine shall be operated and maintained in proper operating condition as recommended by the engine manufacturer or emissions control system supplier. [District Rule 4702 and 40 CFR 60.4211(a)] Federally Enforceable Through Title V Permit

10. All records shall be maintained and retained on-site for a minimum of five (5) years, and shall be made available for District inspection upon request. [District Rule 4702 and 17 CCR 93115] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-13-1
EXPIRATION DATE: 12/31/2012

Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

PERMIT UNIT: S-381-40-1

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
3,455 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #B-42) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2080] Federally Enforceable Through Title V Permit
PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

PERMIT UNIT: S-381-50-1  

EXPIRATION DATE: 12/31/2012  

EQUIPMENT DESCRIPTION: 
12,773 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #SS-12)  
WITH PRESSURE/VACUUM VALVE  

PERMIT UNIT REQUIREMENTS  

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure- 
vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and  
permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V  
Permit  

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in  
accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit  

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a  
gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight  
condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21.  
[District Rule 4694] Federally Enforceable Through Title V Permit  

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days  
following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit  

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in  
the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit  

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank  
including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule  
4694] Federally Enforceable Through Title V Permit  

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded  
weekly. [District Rule 4694] Federally Enforceable Through Title V Permit  

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as  
either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch 
(calculated per the emission factors given in District Rule 4694). [District Rule 4694]  

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon  
request. [District Rule 4694] Federally Enforceable Through Title V Permit  

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-53-1

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
12,773 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #SS-15)
WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine. 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-66-1

EQUIPMENT DESCRIPTION:
7,163 GALLON PLASTIC WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #SS-28)
WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-81-1

EQUIPMENT DESCRIPTION:
10,277 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #SS-47) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-107-1

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
198,762 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #303) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit
PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer’s instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
648,162 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #331) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

Facility Name: HECK CELLARS
Location: 15401 BEAR MOUNTAIN WINERY RD, DIGIORGIO, CA 93260-9393

S-381-144-1 | Aug 22, 2012 | 9:30AM | 9:50AM

DRAFT
PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. 4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-158-1
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
218,185 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #360) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

PERMIT UNIT: S-381-183-1

EQUIPMENT DESCRIPTION:
218,185 GALLON STEEL WINE AND SPIRIT STORAGE AND RED AND WHITE WINE FERMENTATION TANK (TANK #431) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

PERMIT UNIT: S-381-195-1

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
106,878 GALLON STEEL WINE AND SPIRIT STORAGE AND RED AND WHITE WINE FERMENTATION TANK (TANK #473) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V
Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in
accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a
gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight
condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21.
[District Rule 4694] Federally Enforceable Through Title V Permit

4. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days
following completion of fermentation. [District Rule 4694] Federally Enforceable Through Title V Permit

5. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in
the tank shall be recorded weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

6. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank
including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule
4694] Federally Enforceable Through Title V Permit

7. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded
weekly. [District Rule 4694] Federally Enforceable Through Title V Permit

8. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as
either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch
(calculated per the emission factors given in District Rule 4694). [District Rule 4694]

9. All records shall be retained on-site for a period of at least five years and made available for District inspection upon
request. [District Rule 4694] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-210-1

EQUIPMENT DESCRIPTION:
27,528 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #4103) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694] Federally Enforceable Through Title V Permit

2. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694] Federally Enforceable Through Title V Permit

3. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694] Federally Enforceable Through Title V Permit

58,439 GALLON STEEL SPIRIT STORAGE TANK (TANK #PSP 14) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2080] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-340-1

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
58,439 GALLON STEEL SPIRIT STORAGE TANK (TANK #PSP 15) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2080] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

Facility Name: HECK CELLARS
Location: 15401 BEAR MOUNTAIN WINERY RD, DIGIORGIO, CA 93203-9148
PERMIT UNIT: S-381-341-1

EQUIPMENT DESCRIPTION:
17,369 GALLON STEEL SPIRIT STORAGE TANK (TANK #PSP 20) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2080] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-342-1

EQUIPMENT DESCRIPTION:
17,369 GALLON STEEL SPIRIT STORAGE TANK (TANK #PSP 21) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2080] Federally Enforceable Through Title V Permit
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-343-1
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
3,965 GALLON STEEL SPIRIT STORAGE TANK (TANK #PSP 100) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2680] Federally Enforceable Through Title V Permit
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-344-1
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
15,845 GALLON STEEL SPIRIT STORAGE TANK (TANK #WT-30) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2080] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-345-1
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
3,704 GALLON STEEL SPIRIT STORAGE TANK (TANK #WB-24) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. See Facility-wide requirements for conditions applicable to this permit unit. [District Rule 2080] Federally Enforceable Through Title V Permit

SJVUAPCD Permits
Permit to Operate

FACILITY: S-381
LEGAL OWNER OR OPERATOR: HECK CELLARS
MAILING ADDRESS: 15401 BEAR MOUNTAIN WINERY RD
                  DIGIORGIO, CA 93203-9743
FACILITY LOCATION: 15401 BEAR MOUNTAIN WINERY RD
                    DIGIORGIO, CA 93203-9743
FACILITY DESCRIPTION: WINERY

EXPIRATION DATE: 12/31/2012

The Facility's Permit to Operate may include Facility-wide Requirements as well as requirements that apply to specific permit units.

This Permit to Operate remains valid through the permit expiration date listed above, subject to payment of annual permit fees and compliance with permit conditions and all applicable local, state, and federal regulations. This permit is valid only at the location specified above, and becomes void upon any transfer of ownership or location. Any modification of the equipment or operation, as defined in District Rule 2201, will require prior District approval. This permit shall be posted as prescribed in District Rule 2010.

Seyed Sadredin
Executive Director / APCO

David Warner
Director of Permit Services
San Joaquin Valley
Air Pollution Control District

FACILITY: S-381-0-0  EXPIRATION DATE: 12/31/2012

FACILITY-WIDE REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. No air contaminant shall be discharged into the atmosphere for a period or periods aggregating more than three minutes in any one hour which is as dark as, or darker than, Ringelmann 1 or 20% opacity. [District Rule 4101]

3. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201]

4. This facility shall annually achieve the Required Annual Emission Reductions (RAER) as specified in the facility's APCO-approved Three-Year Compliance Plan for District Rule 4694. [District Rule 4694]

5. A Three-Year Compliance Plan that demonstrates compliance with the requirements of Section 5.1 of District Rule 4694 for each year of the applicable compliance period shall be submitted to the District by no later than December 1, 2006, and every three years thereafter on or before December 1. [District Rule 4694]

6. A Three-Year Compliance Plan Verification that demonstrates that the Three-Year Compliance Plan elements are in effect shall be submitted to the District by no later than July 1, 2007, and every three years thereafter on or before July 1. [District Rule 4694]

7. An Annual Compliance Plan Demonstration that shows compliance with the applicable requirements of this rule shall be submitted to the District by no later than March 1, 2008, and every year thereafter on or before March 1. [District Rule 4694]

8. Operators using CER to mitigate fermentation emissions shall perform all monitoring and recordkeeping, as established in their approved Three-Year Compliance Plan, and shall maintain all records necessary to demonstrate compliance. [District Rule 4694]
PERMIT UNIT: S-381-6-0  EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
235 BHP DETROIT MODEL DDFP-04ATRH DIESEL-FIRED EMERGENCY STANDBY IC ENGINE POWERING A FIRE WATER PUMP

PERMIT UNIT REQUIREMENTS

1. Engine shall be equipped with a turbocharger. [District Rule 2201]

2. This engine shall be equipped with an operational non-resettable elapsed time meter or other APCO approved alternative. [District Rule 4702 and 17 CCR 93115]

3. This engine shall be operated and maintained in proper operating condition as recommended by the engine manufacturer or emissions control system supplier. [District Rule 4702]

4. Only CARB certified diesel fuel containing not more than 0.0015% sulfur by weight is to be used. [District Rules 2201 and 4801 and 17 CCR 93115]

5. During periods of operation for maintenance, testing, and required regulatory purposes, the permittee shall monitor the operational characteristics of the engine as recommended by the manufacturer or emission control system supplier (for example: check engine fluid levels, battery, cables and connections; change engine oil and filters; replace engine coolant; and/or other operational characteristics as recommended by the manufacturer or supplier). [District Rule 4702]

6. The permittee shall maintain monthly records of emergency and non-emergency operation. Records shall include the number of hours of emergency operation, the date and number of hours of all testing and maintenance operations, the purpose of the operation (for example: load testing, weekly testing, rolling blackout, general area power outage, etc.) and records of operational characteristics monitoring. For units with automated testing systems, the operator may, as an alternative to keeping records of actual operation for testing purposes, maintain a readily accessible written record of the automated testing schedule. [District Rule 4702 and 17 CCR 93115]

7. An emergency situation is an unscheduled electrical power outage caused by sudden and reasonably unforeseen natural disasters or sudden and reasonably unforeseen events beyond the control of the permittee. [District Rule 4702]

8. This engine shall not be used to produce power for the electrical distribution system, as part of a voluntary utility demand reduction program, or for an interruptible power contract. [District Rule 4702]

9. This engine shall be operated only for testing and maintenance of the engine, required regulatory purposes, and during emergency situations. Operation of the engine for maintenance, testing, and required regulatory purposes shall not exceed 20 hours per calendar year. [District Rule 4702 and 17 CCR 93115]

10. The permittee shall maintain monthly records of the type of fuel purchased, the amount of fuel purchased, date when the fuel was purchased, signature of the permittee who received the fuel, and signature of the fuel supplier indicating that the fuel was delivered. [17 CCR 93115]

11. If this engine is located on the grounds of a K-12 school, or if this engine is located within 500 feet of the property boundary of a K-12 school, the engine shall not be operated for non-emergency purposes, including maintenance and testing, between 7:30 a.m. and 3:30 p.m. on days when school is in session. [17 CCR 93115]

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE
These terms and conditions are part of the Facility-wide Permit to Operate.
12. If this engine is located on the grounds of a K-12 school, the engine shall not be operated for non-emergency purposes, including maintenance and testing, whenever there is a school sponsored activity. [17 CCR 93115]

13. All records shall be maintained and retained on-site for a minimum of five (5) years, and shall be made available for District inspection upon request. [District Rule 4702 and 17 CCR 93115]
PERMIT UNIT REQUIREMENTS

1. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201]

2. The unit shall only be fired on PUC-regulated natural gas. [District Rule 2201]

3. Emissions rates from the natural gas-fired unit shall not exceed any of the following limits: 7 ppmv NOx @ 3% O2 or 0.008 lb-NOx/MMBtu, 0.00285 lb-SOx/MMBtu, 0.0075 lb-PM10/MMBtu, or 100 ppmv CO @ 3% O2. [District Rules 2201, 4305, 4306, 4320]

4. The permittee shall monitor and record the stack concentration of NOX, CO, and O2 at least once every month (in which a source test is not performed) using a portable analyzer that meets District specifications. Monitoring shall not be required if the unit is not in operation, i.e. the unit need not be started solely to perform monitoring. Monitoring shall be performed within 5 days of restarting the unit unless monitoring has been performed within the last month. [District Rules 4305, 4306, and 4320]

5. If either the NOx or CO concentrations corrected to 3% O2, as measured by the portable analyzer, exceed the allowable emissions concentration, the permittee shall return the emissions to within the acceptable range as soon as possible, but no longer than 1 hour of operation after detection. If the portable analyzer readings continue to exceed the allowable emissions concentration after 1 hour of operation after detection, the permittee shall notify the District within the following 1 hour and conduct a certified source test within 60 days of the first exceedance. In lieu of conducting a source test, the permittee may stipulate a violation has occurred, subject to enforcement action. The permittee must then correct the violation, show compliance has been re-established, and resume monitoring procedures. If the deviations are the result of a qualifying breakdown condition pursuant to Rule 1100, the permittee may fully comply with Rule 1100 in lieu of performing the notification and testing required by this condition. [District Rules 4305, 4306, and 4320]

6. All alternate monitoring parameter emission readings shall be taken with the unit operating either at conditions representative of normal operations or conditions specified in the permit-to-operate. The analyzer shall be calibrated, maintained, and operated in accordance with the manufacturer's specifications and recommendations or a protocol approved by the APCO. Emission readings taken shall be averaged over a 15 consecutive-minute period by either taking a cumulative 15 consecutive-minute sample reading or by taking at least five (5) readings, evenly spaced out over the 15 consecutive-minute period. [District Rules 4305, 4306, and 4320]

7. The permittee shall maintain records of: (1) the date and time of NOX, CO, and O2 measurements, (2) the O2 concentration in percent by volume and the measured NOX and CO concentrations corrected to 3% O2, (3) make and model of exhaust gas analyzer, (4) exhaust gas analyzer calibration records, and (5) a description of any corrective action taken to maintain the emissions within the acceptable range. [District Rules 4305, 4306, and 4320]
8. All emissions measurements shall be made with the unit operating either at conditions representative of normal operations or conditions specified in the Permit to Operate. No determination of compliance shall be established within two hours after a continuous period in which fuel flow to the unit is shut off for 30 minutes or longer, or within 30 minutes after a re-ignition as defined in Section 3.0 of District Rule 4306. [District Rules 4305, 4306, and 4320]

9. All alternate monitoring parameter emission readings shall be taken with the unit operating either at conditions representative of normal operations or conditions specified in the Permit to Operate. The analyzer shall be calibrated, maintained, and operated in accordance with the manufacturer’s specifications and recommendations or a protocol approved by the APCO. Emission readings taken shall be averaged over a 15 consecutive-minute period by either taking a cumulative 15 consecutive-minute sample reading or by taking at least five (5) readings, evenly spaced out over the 15 consecutive-minute period. [District Rules 4305, 4306, and 4320]

10. This unit shall be tested for compliance with the NOx and CO emissions limits at least once every twelve (12) months. After demonstrating compliance on two (2) consecutive annual source tests, the unit shall be tested not less than once every thirty-six (36) months. If the result of the 36-month source test demonstrates that the unit does not meet the applicable emission limits, the source testing frequency shall revert to at least once every twelve (12) months. [District Rules 4305, 4306 and 4320]

11. The source test plan shall identify which basis (ppmv or lb/MMBtu) will be used to demonstrate compliance. [District Rules 4305, 4306, and 4320]

12. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified at least 30 days prior to any compliance source test, and a source test plan must be submitted for approval at least 15 days prior to testing. [District Rule 1081]

13. The results of each source test shall be submitted to the District within 60 days thereafter. [District Rule 1081]

14. The following test methods shall be used: NOx (ppmv) - EPA Method 7E or ARB Method 100, NOx (lb/MMBtu) - EPA Method 19, CO (ppmv) - EPA Method 10 or ARB Method 100, stack gas oxygen - EPA Method 3 or 3A or ARB Method 100. [District Rules 1081, 4305, 4306, and 4320]

15. For emissions source testing, the arithmetic average of three 30-consecutive-minute test runs shall apply. If two of three runs are above an applicable limit the test cannot be used to demonstrate compliance with an applicable limit. [District Rules 4305, 4306, and 4320]

16. All records shall be maintained and retained on-site for a minimum of five (5) years, and shall be made available for District inspection upon request. [District Rules 1070, 4305, 4306, and 4320]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be discharged into the atmosphere for a period or periods aggregating more than three minutes in any one hour which is as dark as, or darker than, Ringelmann 1 or 20% opacity. [District Rule 4101]

2. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

3. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201]

4. All brandy storage and aging operations at this facility shall only be performed in Buildings K and L. [District Rules 2201 and 4694]

5. On or before July 1, 2010, this facility may elect to discontinue use of the VOC control system by giving written notice to the District. Such notice shall be given no less than 30 days prior to the planned discontinuance of operation of the system. Upon such notice, the District will administratively revise the permit conditions as noted to allow operation without a VOC control device. [District Rule 2201]

6. Only PUC-regulated natural gas shall be used as supplemental fuel for the regenerative thermal oxidizers. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

7. The brandy storage enclosures and regenerative thermal oxidation system shall be maintained in proper operating condition at all times. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

8. The facility shall notify the District of any occurrence which constitutes a breakdown condition of the VOC control system pursuant to District Rule 1100. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District NSR Rule and District Rule 1100]

9. Manway access doors are defined as doors with a maximum opening of 21 square feet, intended solely for occasional personnel access to the warehouse for maintenance or monitoring activities. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

10. Non-manway access doors are defined as openings equipped with roll-up doors which are required to allow routine movement of brandy into and out of the warehouse or for warehouse access with wheeled and motorized maintenance equipment. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]
11. All openings in the warehouse enclosures which may be opened during "normal operation" of the VOC control system and which do not qualify as manway access doors or non-manway access doors shall be considered to be Natural Draft Openings (NDO) for purposes of certification of the enclosure as a Permanent Total Enclosure pursuant to U.S. EPA Method 204. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

12. "Normal operation" is defined for each warehouse building enclosure as operation with the enclosure meeting the minimum requirements for a permanent total enclosure pursuant to EPA Method 204 (with the fan inlet pressure operating with a vacuum at or higher than the minimum allowed vacuum and all non-manway access doors closed) and the regenerative thermal oxidizer system fully operational with the combustion chamber temperature at or above 1400 degrees F. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

13. The facility shall be equipped with a continuous monitoring system to monitor, at a minimum, the status of the fan inlet pressure control, all non-manway access doors and the combustion chamber temperature of each in-service RTO. Actual hours of "normal operation" shall be continuously and automatically monitored and recorded for each warehouse building enclosure. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

14. Buildings K and L shall be certified and maintained as Permanent Total Enclosures (PTE) pursuant to U.S. EPA Method 204. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

15. Certification of Buildings K and L as Permanent Total Enclosures shall be performed by a District-approved independent certifying entity. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

16. Each manway access door shall be equipped with an automatic closure device to minimize the time that the door is open. Manway access doors shall be opened only as required for access to or exit from the enclosure, minimizing the duration of the opening, and shall not be propped open. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

17. Each non-manway access opening shall be equipped with a motor-actuated door and controls which will minimize the time the door remains open during access and exit and shall be integrated with the continuous monitoring system to record the time periods that the door is open. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rules 1080 and 2201]

18. The fan inlet pressure control point shall be equipped with a continuous pressure monitor integrated with the facility's continuous monitoring system to continuously record the actual fan inlet vacuum. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rules 1080 and 2201]

19. The measured vacuum at the fan inlet pressure control point shall not be less than the established minimum allowable vacuum during "normal operation". This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]
20. Each month the facility shall demonstrate that control of the ID fan inlet pressure at or above the established minimum allowable vacuum is adequate to simultaneously maintain the qualification of all enclosures (Buildings K and L) as Permanent Total Enclosures pursuant to EPA Method 204 by manually measuring and recording facial velocity at the test port opening on each warehouse building enclosure and confirming a minimum facial velocity of 200 feet per minute at each port. If a velocity less than 200 feet per minute is determined, operating adjustments shall be made as required to increase the measured facial velocity to 200 feet per minute within 24 hours of the initial measurement. If the permittee is unable to demonstrate a minimum facial velocity of 200 feet per minute within 48 hours after initial measurement, permittee shall notify the APCO within 72 hours of the initial measurement. After 12 consecutive months of demonstrating the adequacy of the established minimum allowable vacuum, the monitoring frequency can be reduced to once per quarter per warehouse building enclosure. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

21. The induced draft fan and RTO serving the warehouse building enclosures shall be adequately sized to simultaneously maintain "normal operation" for all warehouse building enclosures during periods of maximum brandy loss from the storage and aging operation. This condition may be deleted from the permit on or before July 1, 2010 upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

22. At least one regenerative thermal oxidizer shall operate at all times. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

23. The minimum allowable vacuum at the fan inlet pressure control point, adequate to ensure maintenance of a continuous negative pressure on all warehouse storage enclosures as required to simultaneously qualify all enclosures as Permanent Total Enclosures pursuant to EPA Method 204, shall be demonstrated and recorded annually. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rules 1080 and 2201]

24. Each regenerative thermal oxidizer shall be equipped with a dedicated isolation damper to isolate it from the brandy warehouse when not in operation. The isolation damper shall not be opened unless the regenerative thermal oxidizer it serves is fully operational with a combustion chamber temperature not less than 1400 F. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

25. Each regenerative thermal oxidizer shall be equipped with an operational temperature gauge to indicate the temperature of the combustion chamber. A continuously recording device integrated with the facility’s continuous monitoring system shall be utilized to indicate the combustion chamber temperature during operation. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rules 1080 and 2201]

26. Each regenerative thermal oxidizer shall operate with a combustion chamber temperature of not less than 1400 F when its isolation damper is open to the warehouse. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

27. The VOC destruction efficiency of each regenerative thermal oxidizer shall not be less than 98%. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

28. Routine scheduled maintenance which requires shutdown of the primary (larger) regenerative thermal oxidizer shall not be performed during the months of July, August, or September. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

29. Total annual evaporative emissions from brandy shall not exceed 46,108 lb-VOC/year. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]
30. For any calendar year, total evaporative brandy VOC emissions shall be quantified by the sum of the evaporative brandy VOC emissions emitted to the atmosphere from each warehouse building enclosure. Evaporative losses from each warehouse building enclosure shall be calculated by the following formula: Evaporative Brandy VOC Emissions (tons/year-enclosure) = Uncontrolled Emissions (tons/year-enclosure) x Control Factor. Uncontrolled Emissions = the average enclosure inventory for the calendar year (bbls/enclosure) x the measured brandy loss per barrel for the calendar year in the enclosure (PG/bbl-year) x 3.31 lb-VOC/PG. The Control Factor for the calendar year = (8,760-0.98xH)/8,760, where H is hours of "normal operation" for the enclosure (as defined in this permit) recorded for the calendar year. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

31. Combined VOC emissions from the exhaust of the regenerative thermal oxidizers shall not exceed 81.0 lb/day during "normal operation". This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

32. The emissions from the combustion of natural gas or LPG shall not exceed any of the following limits: 0.494 lb-NOx/MMBtu, 0.084 lb-NOx/MMBtu, 0.0076 lb-PM10/MMBtu, 0.0055 lb-VOC/MMBtu, or 0.00285 lb-SOX/MMBtu. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

33. Source testing shall be conducted using the methods and procedures approved by the District. The District must be notified at least 30 days prior to any compliance source test, and a source test plan must be submitted for approval at least 15 days prior to testing. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

34. The results of each source test shall be submitted to the District within 60 days thereafter. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 1081]

35. Each regenerative thermal oxidizer (RTO) shall be tested for compliance with VOC emissions limits and to demonstrate the destruction efficiency of the RTO at least once every 12 months. After an RTO has demonstrated compliance on two consecutive annual source tests, it shall be tested not less than once every thirty-six months. This condition may be deleted from the permit on or before July 1, 2010 upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rules 1081 and 2201]

36. VOC emissions for source test purposes shall be determined using US EPA Method 25 or Method 18 or BAAQMD ST-32, except when the outlet concentration must be below 50 ppmv in order to meet the standard, in which case US EPA Method 25a may be used. VOC emissions during the source test shall be calculated as the arithmetic average of three 30-consecutive-minute test runs. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

37. Daily and annual records of the hours of operation shall be kept, indicating the time and duration of all periods of outage for the VOC control system including maintenance. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

38. Records shall be kept of all maintenance activities requiring a shutdown of a regenerative thermal oxidizer, including the maintenance activity, time and date of shutdown of the regenerative thermal oxidizer, and the duration of the shutdown. This condition may be deleted from the permit on or before July 1, 2010, upon written notification to the District of intent to discontinue operation of the VOC control system. [District Rule 2201]

39. Records of all required monitoring including facial velocity measurements and annual evaporative VOC emissions shall be maintained. [District Rule 2201]

40. Daily and annual records of the number of barrels in each warehouse storage enclosure shall be kept. [District Rule 2201]
41. Records of all barrel filling and dumping operations shall be kept, recording the proof gallons placed into storage, the proof gallons removed from storage, the proof gallons lost while in storage and the date of each action. Annual summaries of all filling and dumping operations shall be maintained to allow annual determination of total proof-gallons lost from each warehouse building enclosure. All gauging of distilled spirits shall be in accordance with the methods and procedures of the Gauging Manual of the Alcohol and Tobacco Tax and Trade Bureau, Department of the Treasury (27 CFR 30). [District Rule 2201]

42. All records shall be retained for a minimum of five years, and shall be made available for District inspection upon request. [District Rule 2201]
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-11-0
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
240 BHP CLARKE MODEL JU6H-JF60 TIER 2 CERTIFIED DIESEL-FIRED EMERGENCY IC ENGINE POWERING A FIRE WATER PUMP

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]
2. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201]
3. No air contaminant shall be discharged into the atmosphere for a period or periods aggregating more than three minutes in any one hour which is as dark as, or darker than, Ringelmann 1 or 20% opacity. [District Rule 4101]
4. Only CARB certified diesel fuel containing not more than 0.0015% sulfur by weight is to be used. [District Rules 2201 and 4801 and 17 CCR 93115]
5. This engine shall be equipped with an operational non-resetable elapsed time meter or other APCO approved alternative. [District Rule 4702]
6. This engine shall be operated only for maintenance, testing, required regulatory purposes, and during emergency situations. For testing purposes, the engine shall only be operated the number of hours necessary to comply with the testing requirements of the National Fire Protection Association (NFPA) 25 - "Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems", 1998 edition. Total hours of operation for all maintenance, testing, and required regulatory purposes shall not exceed 100 hours per calendar year. [District Rule 4702 and 17 CCR 93115]
7. Emissions from this IC engine shall not exceed any of the following limits: 4.5 g-NOx/bhp-hr, 0.59 g-CO/bhp-hr, or 1.4 g-VOC/bhp-hr. [District Rule 2201 and 13 CCR 2423 and 17 CCR 93115]
8. Emissions from this IC engine shall not exceed 0.14 g-PM10/bhp-hr based on USEPA certification using ISO 8178 test procedure. [District Rules 2201 and 4102 and 13 CCR 2423 and 17 CCR 93115]
9. The exhaust stack shall vent vertically upward. The vertical exhaust flow shall not be impeded by a rain cap (flapper ok), roof overhang, or any other obstruction. [District Rule 4102]
10. The permittee shall maintain monthly records of emergency and non-emergency operation. Records shall include the number of hours of emergency operation, the date and number of hours of all testing and maintenance operations, and the purpose of the operation (for example: load testing, weekly testing, rolling blackout, general area power outage, etc.). For units with automated testing systems, the operator may, as an alternative to keeping records of actual operation for testing purposes, maintain a readily accessible written record of the automated testing schedule. [District Rule 4702 and 17 CCR 93115]
11. All records shall be maintained and retained on-site for a minimum of five (5) years, and shall be made available for District inspection upon request. [District Rule 4702 and 17 CCR 93115]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-12-0

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
17,369 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #BB-1) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer’s instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-14-0  
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
182,523 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #DM51) WITH PRESSURE/VACUUM VALVE

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT: S-381-44-0
EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
10,277 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #SS-6) WITH PRESSURE/VACUUM VALVE

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch [calculated per the emission factors given in District Rule 4694]. [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-57-0

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
12,773 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #SS-19)
WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]
2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-
   vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and
   permanently labeled with the operating pressure settings. [District Rule 4694]
3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in
   accordance with the manufacturer's instructions. [District Rule 4694]
4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a
   gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight
   condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21.
   [District Rule 4694]
5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days
   following completion of fermentation. [District Rule 4694]
6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in
   the tank shall be recorded weekly. [District Rule 4694]
7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank
   including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule
   4694]
8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded
   weekly. [District Rule 4694]
9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as
   either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch
   (calculated per the emission factors given in District Rule 4694). [District Rule 4694]
10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon
    request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

   the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank
   including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule
   4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded
   weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as
   either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch
   (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon
    request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

Air Pollution Control District  

PERMIT UNIT: S-381-70-0  
EXPIRATION DATE: 12/31/2012  

EQUIPMENT DESCRIPTION:  
10,277 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #SS-33)  
WITH PRESSURE/VACUUM VALVE  

PERMIT UNIT REQUIREMENTS  

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]  
2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]  
3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]  
4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]  
5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]  
6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]  
7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]  
8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]  
9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]  
10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-141-0

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
27,621 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #343) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
San Joaquin Valley
Air Pollution Control District

PERMIT UNIT: S-381-163-0

EXPIRATION DATE: 12/31/2012

EQUIPMENT DESCRIPTION:
106,878 GALLON STEEL WINE AND SPIRIT STORAGE AND WHITE WINE FERMENTATION TANK (TANK #365) WITH PRESSURE/VACUUM VALVE AND INSULATION

PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]

6. Except when used for fermentation of wine, the maximum temperature of each batch of wine placed, stored, or held in the tank shall be recorded weekly. [District Rule 4694]

7. Except when used for fermentation of wine, records of filling and emptying operations shall be kept for this tank including the date of the operation, a unique identifier for each batch and the volume of wine transferred. [District Rule 4694]

8. Except when used for fermentation of wine, the wine batch identifier and volume stored in the tank shall be recorded weekly. [District Rule 4694]

9. The following information shall be recorded for each fermentation batch processed in this tank: 1) wine type stated as either red or white wine, 2) total gallons of must fermented, 3) the uncontrolled fermentation emissions from the batch (calculated per the emission factors given in District Rule 4694). [District Rule 4694]

10. All records shall be retained on-site for a period of at least five years and made available for District inspection upon request. [District Rule 4694]

These terms and conditions are part of the Facility-wide Permit to Operate.
PERMIT UNIT REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]

2. Except when used for fermentation of wine, the wine storage tank shall be equipped and operated with a pressure-vacuum relief valve, set to operate within 10% of the maximum allowable working pressure of the tank and permanently labeled with the operating pressure settings. [District Rule 4694]

3. Except when used for fermentation of wine, the pressure-vacuum relief valve shall be installed and operated in accordance with the manufacturer's instructions. [District Rule 4694]

4. Except when used for fermentation of wine, the pressure-vacuum relief valve and wine storage tank shall remain in a gas-tight condition except when the operating pressure of the tank exceeds the valve set pressure. A gas-tight condition shall be determined by measuring the gas leak in accordance with the procedures in EPA Method 21. [District Rule 4694]

5. The temperature of each batch of wine placed, stored, or held in the tank shall not exceed 75 degrees F after 60 days following completion of fermentation. [District Rule 4694]
